EDUCATION

Sardar Vallabhbhai National Institute of Technology, Surat (SVNIT) <i>B.Tech - Computer Science and Engineering</i>	Expected 2028 <i>CGPA: 8.63</i>
The Indian School, Kingdom of Bahrain <i>AISSCE - 12th</i>	2024 <i>Percentage: 94</i>

EXPERIENCE

Software Engineering Intern <i>Yokogawa Electric Corporation</i>	June 2026 – July 2026 <i>Kingdom of Bahrain</i>
- Developed a full-stack Plant Maintenance System for a company manufacturing plant with RBAC-based access control and offline intranet deployment - Authored and revised technical documentation for applications, improving consistency, and accessibility for engineering teams - Collaborated with cross-functional engineers in technical meetings to align on system design, requirements, and implementation decisions	
Data Analyst Intern <i>Best Power Controls</i>	May 2025 – July 2025 <i>Kingdom of Bahrain</i>
- Collected and consolidated data from databases, surveys, and web sources to support business analysis and decision-making - Queried and managed relational data using MySQL to extract insights and answer key business questions - Built interactive charts and reports using Excel and HTML/CSS/JavaScript to visualize trends and metrics	

PROJECTS

Plant Maintenance System <i>Python, FastAPI, Bootstrap5, SQLite</i>	
- Built a full-stack Plant Maintenance System featuring RBAC-based access control and fully offline deployment on the plant's intranet - Architected the system to reliably support 25+ concurrent users, ensuring smooth performance for multiple technicians/staff accessing the system simultaneously - Designed RESTful APIs with FastAPI to handle CRUD operations for equipment maintenance of 3000+ records, schedules, and logs	
EstateEngine <i>Python, FastAPI, ReactJS, ChromaDB, Gemini LLM</i>	
- Developed a full-stack RAG application that analyzes 3,300+ real estate listings to generate grounded buy-vs-rent financial recommendations - Built a custom retrieval pipeline using TF-IDF embeddings for local semantic search, paired with an LLM layer constrained to prevent numerical hallucination - Designed and implemented finance modeling logic (loan, tax, appreciation, ROI) and exposed it through multiple REST APIs for chat, property explanation, and market analytics	

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, HTML5, CSS3, SQL
Databases: MongoDB, MySQL, PostgreSQL, SQLite
Frameworks: ReactJS, Node.js, Express.js
Libraries: Pandas, NumPy, FastAPI
Developer Tools: GitHub, Google Cloud Platform, Visual Studio Code, Claude Code
Core Concepts: Object-Oriented Programming, Data Structures, Design and Analysis of Algorithms, Computer Networks, Computer Organization, Information Security, Artificial Intelligence, Database Management System

ADDITIONAL INFORMATION

- Certifications:** Productivity with Generative AI - Microsoft and LinkedIn, Google Cloud Study Jams 2025
- Achievements:** Winner (1st Place) in Genesis AI/ML Bootcamp hosted by ACM, GDGC, and CEV; Finalist in PowerMind Hackathon hosted by Adani Enterprise and Career Development Cell (CDC)
