## Education

Sardar Vallabhbhai National Institute of Technology, Surat

Aug 2024–Present

B.Tech in Computer Science and Engineering ,CGPA: 7.4/10.0

## Projects

**BidKar – Real-Time Auction Platform** | *Node.js, Express, WebSockets, Redis, Razorpay*

[Live](#) |  [GitHub](#)

- Engineered a low-latency bidding engine utilizing **Socket.io** to synchronize live states, integrating **Redis** to achieve sub-millisecond retrieval times for the live leaderboard and 60-second timers.
- Implemented distributed **Redis Locking** mechanisms to serialize high-frequency concurrent bid requests, mitigating race conditions and safeguarding database consistency during peak traffic.
- Architected a secure wallet infrastructure integrating the **Razorpay API** to process 10% escrow deposits via a manual capture flow, utilizing **MongoDB transactions** to ensure strict financial data integrity.
- Secured RESTful API endpoints utilizing **JWTs** in **httpOnly cookies** and a 4-tier **Role-Based Access Control (RBAC)** system, alongside developing automated **cron jobs** for precise auction expiration.
- Designed an end-to-end **auction settlement** pipeline using a modular **MVC architecture** for Wallet, Payment, and Transaction handling, dynamically embedding resolved financial data into **EJS templates** for automated invoice generation.

**Bloom Branding – Portfolio Website** | *React.js, Node.js, Express, MongoDB, JWT, Framer Motion*

[Live](#) |  [GitHub](#)

- Built a full-stack portfolio and lead generation website using the **MERN stack** with responsive **React** components and a modern UI architecture.
- Implemented smooth UI interactions and page transitions using **Framer Motion/GSAP** with routing handled through **React Router**.
- Developed **RESTful APIs** with **Node.js** and **Express** and designed **MongoDB schemas** to manage testimonials, brand profiles, client assets, and enquiries.
- Created an admin CMS panel with **JWT authentication** and integrated media uploads using **Multer/Cloudinary** for dynamic website content management.

**YelpCamp** | *Node.js, Express, MongoDB, EJS, Bootstrap*

[Live](#) |  [GitHub](#)

- Developed a full-stack RESTful web application for discovering and reviewing campgrounds using Node.js, Express.js, and MongoDB.
- Implemented secure user authentication and role-based authorization using **Passport.js** to manage user permissions and protect route integrity.
- Integrated the **Mapbox API** for dynamic interactive mapping and utilized Cloudinary for efficient cloud-based image storage and optimization.
- Designed a responsive, mobile-first user interface utilizing the **Bootstrap** framework and **EJS templating** for dynamic content rendering.

## Technical Skills

**Programming Languages:** C, C++, JavaScript, Python

**Libraries & Frameworks:** React.js, Node.js, Express.js, Socket.io

**Databases & Caching:** MongoDB, MySQL, Redis

**Tools & Technologies:** Git, GitHub, Postman, WebSockets, JWT, REST APIs

**Core CS Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)

## Achievements

- Solved **360+ DSA problems** on LeetCode.
- **Biothon Hackathon Finalist:** Secured top 10 out of 400 teams at Marwadi University. [\[Certificate\]](#)
- **JEE Main 2024:** Achieved a **99.63 overall percentile**, securing a **perfect 100 percentile in Physics** across both testing sessions.
- Completed **The Web Developer Bootcamp** by Colt Steele [\[Certificate\]](#), building full-stack applications using the MERN stack.

## Position of Responsibility

- **Executive:** Association for Computing Machinery (ACM), SVNIT

Sept 2025 – May 2026
