EDUCATION

Sardar Vallabhbhai National Institute of Technology, Surat

Bachelor of Technology in Computer Science

CGPA - 8.3

Aug. 2024 – May 2028

RELEVANT COURSEWORK

Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Artificial Intelligence

PROJECTS

VendorBridge - Procurement ERP | *Next.js, TypeScript, PostgreSQL, Prisma, JWT, Nodemailer* [GitHub](#) | [Link](#)

- Architected a full-stack procurement management system supporting vendor onboarding, RFQ workflows, quotation management, approval chains, and invoice generation for enterprise procurement operations.
- Implemented multi-tenant architecture with role-based access control (RBAC) — Admin, Procurement Officer, Manager Approver, and Vendor roles with granular permissions enforced at edge and route levels.
- Designed sophisticated procurement workflow with RFQ creation, vendor invitations, quotation submission, side-by-side comparison, manager approvals, and automated PO/invoice generation with GST calculations.
- Built JWT-based authentication with bcryptjs password hashing, HTTP-only secure cookies, and comprehensive audit logging with real-time activity tracking and notifications for complete accountability.

File Previewer | *React, Vite, Chrome Extensions API, Firefox Add-ons, JSZip, npx* [GitHub](#) | [Chrome](#) | [Firefox](#)

- Reduced reliance on external file viewers by developing a cross-browser extension, enabling direct in-browser preview of GitHub-hosted files and improving developer efficiency.
- Implemented real-time parsing and inspection for NumPy (.npy), ZIP, and CSV files using binary stream processing.
- Designed a VS Code-like ZIP explorer allowing nested navigation, selective file preview, and targeted downloads.
- Developed a GitHub-native side panel UI with dark/light/system theme sync, clipboard support, and seamless UX integration.

TransitFlow | *LangGraph, Node.js, React, MongoDB, Google Maps, MapTiler, Socket.IO, Gemini* [GitHub](#) | [Link](#)

- A comprehensive urban mobility platform integrating smart parking, carpooling, real-time bus tracking, and multi-modal route planning with interactive maps and fare optimization.
- Built a RAG-powered chatbot with LangGraph + Google Gemini, delivering context-aware query accuracy using external data sources for comprehensive transit guidance and support.
- Integrated Google Maps (Directions, Places) and MapTiler APIs to provide live routes, nearby search, parking availability, and geospatial visualization across 25+ cities.
- Developed real-time carpool chat with Socket.IO, supporting 100+ concurrent users with zero downtime and complete trip history tracking with user ratings and reputation management.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, SQL, HTML, CSS

Frameworks: React, Node.js, FastAPI, Express.js, Django, Next.js

Developer Tools: Git, Docker, Google Colab, VS Code, Hoppscotch

Database: MongoDB, MySQL, Firestore, Redis

Deep Learning & ML Frameworks: PyTorch, TensorFlow, Scikit-learn

Data & Experimentation: NumPy, Pandas, Matplotlib, Seaborn, OpenCV

COMPETITIVE PROGRAMMING

LeetCode: Contest Rating 1811 (max rating), Solved 1200+ problems

Codeforces: Contest Rating 1076 (max rating)

CodeChef: Contest Rating 1543 (max rating)
