

ATHARVA CHOUDHARI

Sophomore, CSE Sardar Vallabhbhai National Institute of Technology, Surat (NIT Surat)

📞 9767096254 ✉ choudhariatharva007@gmail.com 🔗 LinkedIn 🐙 GitHub 📍 Pune, India

PROFESSIONAL SUMMARY

Computer Science sophomore at SVNIT Surat with strong foundations in algorithms, discrete mathematics, and systems. Deeply interested in Artificial Intelligence, Machine Learning, and Cybersecurity, particularly in understanding how intelligent systems can be designed securely and robustly. Passionate about exploring research problems that combine data-driven modeling with system-level security challenges. Actively seeking research opportunities to contribute to meaningful academic work while strengthening theoretical and practical expertise.

WORK EXPERIENCES

Volunteer

Nov 2024 - Present

Spic Macay

- **Hosted** the **Virasat festival** twice, showcasing esteemed **Padma Bhushan** and **Padma Vibhushan** artists. **Led** cultural engagement initiatives, coordinated artist interactions, and ensured **effective event execution**.

Representative

2025 - Present

NEXUS Cell (CSE Department)

On-site

- **Mentored juniors** in data structures and algorithms (DSA), organized practice sessions and coding challenges.

Cultural Secretary

Aug 2025 - May 2026

Hostel 9, Nehru Bhavan

- **Organized and managed cultural events** and programs for over **400 residents**, enhancing community engagement.

Coordinator

Jul 2025 - May 2026

Academic Affairs Council

- **Oversaw academic initiatives**, mentorship programs, and student engagement activities. Worked with faculty and student representatives to facilitate academic support sessions.

PROJECTS

WAVES - Water Availability & recharge Viability Estimation System | 🐙 Github

Lead Developer

- Built a full-stack rainwater harvesting feasibility web app integrating real-time rainfall data, CGWB's 2,759-well groundwater dataset and standard runoff algorithms to auto-generate recharge structure dimensions, cost estimates and payback periods for any Indian location. Containerized microservices architecture using Python/Flask, Node.js/Express and Docker, targeting Smart India Hackathon.

GreenPass | 🐙 Github

Designer

- Designed an **AI-based traffic management system** that dynamically prioritizes ambulances by integrating with traffic signal control logic. Implemented adaptive signal timing based on real-time vehicle density in each lane to minimize overall wait time.

CricketMatchPredictor - CMP | 🐙 Github

Developer

- Developed a **machine learning model** to **predict cricket match outcomes** using historical match data and statistical features. Performed data preprocessing, feature engineering, and model evaluation using supervised learning techniques.

SKILLS

Databases :

MySQL, MongoDB

Languages :

English, Hindi, Marathi, French (Basic Proficiency)

Programming Languages :

C, C++, Python, HTML, CSS, Javascript, SQL

Soft Skills :

Algorithmic Thinking, Mathematical Modeling, Research Paper Reading & Analysis, Technical Documentation, Strong Problem-Solving Ability

Tools & Platforms :

Git, GitHub, Docker

EDUCATIONS

Sardar Vallabhbhai National Institute of Technology | Surat, Gujarat

2024 - 2028

B.Tech in Computer Science and Engineering

CGPA : 8.94

- **Graduation Year** 2028 | Sem1 : **9.1** | Sem2 : **9.0** | Sem3 : **8.55** Sem4 : **9.1**

Maharashtra State Board | Pune, Maharashtra

2022 - 2024

Higher Secondary (Class XII)

CGPA : 86.6

- **Graduation Year** 2024 | **86.6%**

CERTIFICATIONS / ACHIEVEMENT

- **Finalist** for **International SpellBee 2022**
- **Ethical Hacking Certification** from IIT Bombay
