

AYUSH BADRAKIYA

Surat, Gujarat, India 360410 | +91 7990659055 | ayushbadrakiya@gmail.com

[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [HackerEarth](#)

SUMMARY

Detail-oriented student with a focus on project management and problem-solving. Experienced in collaborating with peers on academic projects, delivering presentations, and adapting to diverse team dynamics to achieve goals.

SKILLS

C
C++
DSA
MERN Stack Web Development,
Basic of Machine Learning and Deep Learning

PROJECTS & ACHIVMENTS

Google Winter of Code (GWOC) 2026 Winner

Successfully participated in and won GWOC 2026.

Developed and deployed a comprehensive project during the program.

Certificate Link: <https://drive.google.com/file/d/1CjahFMn9pFrKhLmEqStuqfsKMqrdUeqH/view?usp=sharing>

Basho (Japanese Pottery E-Commerce App) | Winner, GWOC 2026

GitHub: github.com/ayushbadrakiya/gwoc-basho

- Built an end-to-end MERN stack platform for a startup to sell Japanese pottery and manage workshop bookings.
- Integrated **Razorpay** for secure checkout, OTP-based authentication, and **Brevo** for automated email workflows.
- Developed a custom product feature utilizing **Cloudinary** for seamless user image uploads and optimized cloud storage.

Predictive Maintenance AI for IIoT Systems | Python, TensorFlow/Keras, Pandas, NumPy

GitHub: <https://github.com/ayushbadrakiya/LSTM-Model->

- **Architected a Deep LSTM Network:** Developed a recurrent neural network to forecast the Remaining Useful Life (RUL) of industrial machinery using multi-variate, time-series sensor telemetry from the NASA CMAPSS dataset.
- **Engineered Sequential Data Pipelines:** Designed a robust preprocessing engine featuring 3D sliding-window array generation and piecewise linear degradation thresholding to optimize raw sensor data for model ingestion.
- **Optimized Model Performance:** Implemented batch normalization, dynamic learning rate scheduling and dropout regularization, achieving an excellent **0.87 R^2 score** in predicting hardware failure cycles.

EXPERIENCE

Google Developer Groups on Campus (GDGC) – SVNIT | Surat, India *Junior Developer* |

June 2025 – Present

- Collaborate with peer developers on technical and academic projects, effectively coordinating team efforts to deliver functional solutions.
- Deliver technical presentations on emerging industry topics and curriculum-aligned concepts, facilitating knowledge-sharing among club members.
- Engage in collaborative programming and problem-solving initiatives, fostering a strong culture of teamwork and continuous learning.

EDUCATION AND TRAINING

Expected in 05/2028

B.TECH.

Current CGPA 8.78

Sardar Vallabhbhai National Institute of Technology – Surat
