Education

Degree/Certificate	Institute	Year	Performance
B.Tech in Computer Science	SVNIT, Surat	2028 (Expected)	7.67 CGPA
HSC (12th Grade)	R.K. Science School (GSEB)	2024	90.8%
SSC (10th Grade)	M.G. Patel Higher Sec. School	2022	96.33%

Coding Profiles

- **LeetCode**: Solved 514+ Problems, Max rating: **1679** (Top 15.4%) – leetcode.com/u/Nishant_babariya_21
- **Codeforces**: Solved 52+ Problems, Max rating: **1156** – codeforces.com/profile/Nishant_babariya_21

Projects

1. Codespace IDE – AI-Powered Cloud Sandbox Platform

[Source Code](#)

Node.js, Express, React, Vite, Kubernetes, LangChain, Mistral AI, Redis, RabbitMQ, AWS S3, Monaco Editor, Xterm.js

- Designed a scalable **microservices architecture** using **4 independent microservices** (Frontend UI, Auth Engine, Notification Consumer, and AI/Sandbox Orchestrator) to maximize fault isolation.
- Provisioned dynamically isolated workspace containers using the **@kubernetes/client-node** API within seconds to host **automated, sandboxed frontend website generation cells**.
- Deployed an automated resource cleaner running within the sandbox orchestrator, utilizing a **Redis Key-Space Notification (TTL)** pipeline to automatically tear down ephemeral K8s Pods and Services upon session expiration.
- Orchestrated an event-driven asynchronous processing framework using a **RabbitMQ** message broker to securely consume identity verifications without blocking main application execution routes.
- Formulated an **agentic developer workflow** using **LangChain** and **Mistral AI** (*mistral-large-latest*) paired with secure sidecar filesystem tool bindings to execute batch code updates autonomously.
- Built a premium console UI integrating **@monaco-editor/react**, live wildcard reverse-proxy app previews, and **xterm.js** terminal routing via persistent WebSockets.

2. Stockie – Stock Market Tracking Platform

[Source Code](#)

Next.js 16, TypeScript, Better-Auth, Inngest, Nodemailer, Finnhub API, TradingView Widgets, Recharts, Shadcn UI

- Developed a financial tracking platform utilizing the **Next.js 16 App Router** and **TypeScript**, enabling secure user authentication and session management via **Better-Auth**.
- Configured a custom watchlist and **dynamic price alert framework** powered by **Inngest** for background job monitoring, triggering automated HTML email notifications via **Nodemailer** when user-defined thresholds are crossed.
- Integrated **TradingView widgets** and **Recharts** to deliver advanced **real-time candlestick configurations**, comprehensive technical analysis, asset allocation breakdowns, and interactive data visualization for portfolio holdings.
- Managed dynamic data pipeline integrations with the **Finnhub API** to dynamically fetch up-to-date company metrics, market heatmaps, and general financial news feeds.

3. Bloom Branding – GWOC Team Project

[Live Demo](#) – [Source Code](#)

React.js, Node.js, MongoDB, Mongoose, Gmail API, Google Gemini

- Built a story-led creative agency platform featuring an **animated 3D hero section** and scroll micro-interactions.
- Engineered a **CMS-powered admin panel** using Mongoose to manage real-time portfolio logs and client details.
- Integrated Gmail API for **automated dual email triggers** mapping user queries directly to administrative portals.
- Structured highly scalable schemas to efficiently store leads, user inquiries, and manage secure admin OTP flows.

Technical Skills

Languages: C, C++, Python, JavaScript, TypeScript, SQL, HTML/CSS

Technologies: ReactJs, NextJs, NodeJs, ExpressJs, Socket.IO, Mongoose, NextAuth.js, Better-Auth, Zod, Tailwind CSS, RabbitMQ, GSAP, Three.js (Basics)

AI & Machine Learning: Machine Learning (ML), Generative AI, Retrieval-Augmented Generation (RAG), LangChain, LangGraph

Databases: PostgreSQL, MongoDB, MySQL

DevOps & Tools: Git, GitHub, Docker, Kubernetes, Skaffold, Nginx, AWS

Core CS Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Computer Networks, Computer Organization

Achievements & Certifications

- **1x Hackathon Finalist**: Selected as a finalist among engineering teams by building functional, rapid prototypes during competitive hackathons.
- **GirlScript Summer of Code (GSSoC)**: Selected as an open-source contributor to develop core software modules across collaborative ecosystem structures.
- **State Rank 5 (10th Grade)**: Secured 5th rank in Gujarat (GSEB) with a 99.95 percentile score.
