Examination	University	Institute	Year	CPI/%
Graduation	SVNIT	SVNIT,Surat	2024-28	7.34
Hsc	GSEB	Royal Science School, Surat	2023-2024	95
SSC	GSEB	Risen Modern School, Surat	2022	92.17

PROJECTS

- AgriTech & Crop Recommendation System** (Focus: Web Development & Python/AI)
- Developed a smart agricultural platform that analyzes plant health via image processing to recommend specific treatments and medicines for disease control.
- Implemented a recommendation engine that suggests optimal crops based on real-time soil data, seasonal trends, and weather forecasts.
- Integrated weather API alerts to provide farmers with timely warnings about extreme conditions, helping minimize crop loss.
- Vehicle Rental System**
(Focus: C++ & Object-Oriented Programming)
- Architected a dual-interface rental platform allowing users to both book vehicles for personal use and list their own vehicles for rent.
- Applied Object-Oriented Programming (OOP) principles such as Inheritance and Polymorphism to efficiently manage diverse vehicle classes (Cars, Bikes, SUVs).
- Designed a robust booking logic that handles availability tracking and fare calculation, demonstrating strong grasp of class encapsulation.
- Blood Donation Camp Management System**
(Focus: SQL & Database Management)
- Engineered a relational database schema to securely manage donor records and inventory, ensuring efficient data retrieval during emergencies.
- Implemented strict integrity constraints using SQL triggers to automatically validate donor eligibility (e.g., Age > 18, mandatory 90-day gap between donations).
- Optimized database queries to filter donors by specific blood groups and location, streamlining the coordination of donation camps.

TECHNICAL SKILLS

- C , C++ , Python
- Html , css , javascript , react
- Dbms , oops , dsa , problem solving
- Other skills: Communication, Team work, Adaptability ,project mangement

EXPERIENCE

- Contributed to software and web-based academic projects with a focus on functionality and innovation.
- Designed and tested frontend features using React and JavaScript for group-based coursework.
- Enhanced collaboration and productivity through peer code reviews and shared debugging session

AREA OF INTEREST

HOBBY

- Problem Solving
- Data Engineering

- Coding
- Reading
