ABOUT ME

Computer Science undergraduate at SVNIT Surat with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, and Full-Stack Development. Passionate about building scalable software solutions and solving challenging programming problems. Experienced in developing web and mobile applications using modern technologies and continuously learning software engineering best practices.

EDUCATION

SARDAR VALLABHBHAI NATIONAL INSTITUTE OF TECHNOLOGY (SVNIT), SURAT

2024-2028 batch

VIVEKANADA JUNIOR COLLEGE

2022-2024 batch

SKILL

Languages

- C++
- Python
- JavaScript
- SQL

Web Technologies

- HTML
- CSS
- React
- React Native
- Node.js
- Express.js
- Databases
- MongoDB
- Firebase Firestore
- MySQL

Tools

- Git
- GitHub
- VS Code
- Linux

Concepts

- Data Structures
- Algorithms
- OOP
- REST APIs
- Database Design

PROJECTS

Plate2Eat – Surplus Food Management System

Web Application

- Developed a platform to connect food donors with NGOs and volunteers to reduce food wastage.
- Enabled surplus food listing, request handling, and basic user coordination.
- Focused on social impact by minimizing food waste and improving food distribution efficiency.

FinTrack – Mobile Expense Tracker

Mobile Application

- Designed an application to track daily expenses and manage personal finances.
- Implemented features for categorizing expenses and monitoring spending patterns.
- Helped users gain better control over budgeting and financial planning.

AI-Based Attendance System

- Processed real-time attendance data using Python
- Stored and analyzed attendance trends for reporting

TECHNICAL INTERESTS

- Software Engineering
- Backend Development
- Full Stack Development
- Distributed Systems
