

AISHWARY GUPTA

SVNIT, Surat, Gujarat, India · +91-8798157597 · aishwaryg01@gmail.com
LinkedIn: linkedin.com/in/01aishwary · GitHub: github.com/01aishwary · Portfolio

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Developer with strong proficiency in React.js, Next.js, and TypeScript. Experienced in architecting scalable, responsive user interfaces and integrating robust backend REST APIs. Proven track record of optimizing application performance, reducing latency, and building secure platforms. Adept at leveraging modern web technologies and advanced animation libraries to deliver seamless, high-performance user experiences.

EDUCATION

Sardar Vallabhbhai National Institute of Technology (SVNIT)
Bachelor of Technology | CGPA: 7.6/10

Surat, Gujarat
Aug 2024 – May 2028

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++ (STL), Python, HTML5, CSS3
Frontend Frameworks & Libraries: React.js, Next.js, React Native, Tailwind CSS, GSAP, Framer Motion
Backend & Databases: Node.js, FastAPI, MongoDB, Mongoose, MySQL, REST APIs
AI & Data Science: Pandas, NumPy, Scikit-learn, RAG, AI Agents, GenAI
DevOps & Tools: Git, GitHub, Docker, Vercel, Postman

TECHNICAL PROJECTS

- FinTrack: AI-Powered Personal Finance Dashboard** | *React Native, FastAPI, Python* [GitHub]
- Architected a cross-platform personal finance application utilizing React Native and Expo, translating complex Figma wireframes into highly responsive web and mobile interfaces.
 - Engineered automated data pipelines integrating frontend components with FastAPI backend services, successfully processing over 10,000 transaction records and eliminating manual categorization.
 - Boosted rendering speed across Android and Web platforms by implementing advanced state management and React memoization techniques.
- Get Me a Chai: Crowdfunding Platform** | *Next.js, React, MongoDB, Tailwind CSS* [GitHub]
- Developed a scalable crowdfunding web application by engineering highly reusable functional components, ensuring absolute cross-browser compatibility and mobile-first responsiveness.
 - Integrated secure Razorpay payment gateways and robust REST APIs, successfully supporting concurrent user sessions with zero-downtime real-time transaction updates.
 - Decreased API latency by implementing lazy loading, component code-splitting, and semantic HTML structure, strictly adhering to WCAG accessibility and technical SEO standards.
- SrtLinks: URL Shortening Platform** | *Next.js, React, MongoDB, Tailwind CSS* [GitHub]
- Built a high-performance URL management dashboard capable of tracking shortened links securely, featuring robust JWT authentication and automated email verification systems.
 - Designed an efficient, state-driven UI architecture that provides real-time error handling and feedback, drastically improving the platform's debugging capabilities.
 - Optimized redirection latency and reduced debugging time by refactoring the monolithic codebase into a highly modular, component-split architecture.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Google Developer Groups on Campus (GDGC)** | *Junior Developer* | SVNIT, Surat Mar 2026 – Present
- Coordinated cross-functional teams to organize hackathons, managing core event operations, student engagement, and logistics for 200+ participants.
- Cutting Edge Visionaries (CEV)** | *Finance Head* | SVNIT, Surat Jun 2026 – Present
- Led sponsorship outreach and managed on-ground execution logistics for technical events, successfully coordinating program operations for over 300 participants.

CERTIFICATIONS

- FLY (Finding the Leader in You) Graduate:** Foundation For Excellence (Dec 2025) – Completed 20+ hours of training in problem-solving, agile team coordination, and project execution methodologies. [Credential]
- Machine Learning Specialization:** Built predictive regression models, implemented optimization algorithms, developed tree-ensemble networks, and applied unsupervised learning techniques. [Credential]
- Data Science Mastery:** Applied complex data analysis, visualization, and machine learning workflows utilizing Python, NumPy, and Pandas. [Credential]
