

Khyati Srivastava

Student at Sardar Vallabhbhai National Institute of Technology

khyatisri0512@gmail.com | 9099614090 | Surat, India | 2005-12-05 | Indian

PROFESSIONAL EXPERIENCE

05/2026 – 07/2026	Orbitt Space, Summer Intern Summer intern for the power electronics team at Orbitt Space. Involved in testing and simulation of power circuits such as DC-DC Power Convertors and Input Filters and Plasma Diagnostic circuits to be deployed in a Very Low Earth Orbit satellite bus which is powered by an Air Breathing Electric Propulsion system.	Ahmedabad, India
12/2025 – 01/2026	IIMA, Intern "Can AI Detect Misleading data visualization" under Prof Kavitha Ranganathan Created a taxonomy of Misleading Data Visualisations, built a dataset consisting of the various types of Misleading Data Visualisation and tested whether generative AI's (Gemini, CoPilot, ChatGPT) were able to detect the misleading factor in the given example.	Ahmedabad, India

EDUCATION

05/2009 – 2023	All India Senior Secondary School Examination, Prakash Higher Secondary School Class 12 – 95.2% Class 10 – 92.8%	Ahmedabad, India
08/2024	Bachelors of Technology, <i>Sardar Vallabhbhai National Institute of Technology, Surat</i> Pre-final Year in the Electronics and Communication Engineering Department. Interested in pursuing Signal Processing, Machine Learning, Embedded systems and Analog and Power Electronics.	Surat, India

RELEVANT COURSE WORK

Engineering Mathematics

Linear Algebra, Higher Order Differential Equations, Multivariate Calculus, Fourier transforms, Laplace transforms, Z-transform

Analog and Digital Electronics

Semiconductor Devices and Physics, Electronic Circuits, Analog Circuits, Linear IC Applications, Digital Logic and Design, Microprocessors and Microcontrollers, Digital Integrated Circuits,

Circuit Analysis

LTSpice, NGSpice

Signal Processing

Signals and Systems, Statistical Signal Analysis

Programming Languages

Python (with basic libraries), Structured Query language, C, embedded C, Arm Cortex M0+

PROJECTS

06/2026 – 07/2026	Input Filter Design Designed, simulated and tested a single section Input Filter according to MIL-STD-461E standards for giving pure DC input to a 12W Forward Converter on SPICE software, for an attenuation of 70dB at 100kHz.
05/2026 – 05/2026	Forward Converter Designed, simulated and made a closed loop forward converter, converting 70V DC supply to 12V DC for a housekeeping circuit used for powering other integrated circuits in the system.
03/2026 – 04/2026	Log and Antilog Amplifiers, Solar Tracker As part of our course on Linear IC Applications, we made a solar tracker and log and antilog amplifiers using operational amplifier (IC - 741) from the concepts learned in the course.
07/2025 – 09/2025	Go-To-Goal Localization Autonomous mobile robot project demonstrating precise Go-to-Goal navigation. Engineered the system using Mecanum wheels for omnidirectional movement, controlled by a PID loop that continuously adjusted motion based on error. Integrated an IMU/gyroscope and wheel encoders to provide accurate path correction and reliable movement to the target destination.
02/2025 – 02/2025	Grand Robo Prix Organized by Drishti, the Robotics Club of SVNIT.

AWARDS

28/02/2023	National Mathematics Olympiad Contest, All India Schools Mathematics Teachers Association Score:- 69%
	International Informatics Olympiad 2022-23, Silverzone Foundation, New Delhi State Rank:- 8 Olympiad Rank:-148

Marks obtained :- 71.0585/100

International Olympiad of English Language Level 1 2022-23, Silverzone Foundation, New Delhi

State Rank:- 1

Olympiad rank:- 56

Marks obtained :- 88.0707/100

International Olympiad of English Language Level 2 2022-23, Silverzone Foundation, New Delhi

State Rank:- 14

Olympiad Rank:- 274

Marks obtained :- 74.3090/100
