OBJECTIVE

Electronics and VLSI undergraduate with strong foundation in digital logic design and embedded systems. Passionate about RTL design and FPGA-based development. Seeking internship opportunities to apply Verilog coding, simulation, and hardware debugging skills in real-world VLSI applications.

EDUCATION

B.Tech in Electronics and VLSI Engineering

2024 – 2028

Sardar Vallabhbhai National Institute of Technology, Surat

CGPA: 8.44 (Till 3rd Semester)

TECHNICAL SKILLS

Programming: C, C++, Embedded C

HDL: Verilog

Tools: Arduino IDE, Visual Studio

Core Subjects: Digital Logic Design, Analog Electronics, Microprocessors and Microcontrollers

PROJECTS

4-bit Adder-Subtractor using Verilog

- Designed and implemented combinational adder-subtractor circuit using Verilog HDL.
- Performed simulation and functional verification using testbench.
- Analyzed carry propagation and overflow conditions for arithmetic operations.

Line Follower Robot using PID Controller

- Implemented PID control algorithm for accurate line tracking and reduced oscillations.
- Tuned K_p, K_i, K_d parameters to minimize steady-state error.
- Interfaced IR sensor array with microcontroller for real-time motor control.

AREA OF INTEREST

I am interested in VLSI Design and Embedded Systems, with a strong inclination toward digital electronics and hardware design. I am particularly curious about how digital circuits are designed, optimized, and implemented at the chip level. I am also interested in learning more about RTL design, FPGA implementation, and microcontroller-based embedded system development. Currently, I have foundational knowledge in these areas and am eager to deepen my understanding through practical projects and hands-on experience.

POSITIONS OF RESPONSIBILITY

- Co-Head, MindBend Technical Fest – Coordinated event operations and managed team activities.
- Represented institute in Inter-NIT Badminton Tournament.
