EDUCATIONS

Sardar Vallabhbhai National Institute of Technology | Surat, India

2024 - 2028

Bachelor of Technology - Mathematics and Computing(MaC)

CGPA : 8.87

- Courses: Linear Algebra, Probability & Statistics, Data Structures and Algorithms, Databases, OOPs,OS,CN.

WORK EXPERIENCES

Google Winter of Code (GWOC) -Software Development

Dec 2025 - Jan 2026

MindSettler

Offline

- **Developed** a context-aware **AI chatbot** utilizing **OpenRouter** and **Gemini 2.5**, implementing system prompt engineering and a custom safety interception layer to ensure non-medical compliance.
- **Architected** a mental wellness platform with **Next.js 15** and **React 19**, featuring a modern glassmorphic UI designed with **Tailwind CSS** and **Framer Motion**, supported by a scalable **Node.js**, **Express.js**, and **MongoDB** REST API backend, employing **Object-Oriented Programming** principles.
- **Built** an appointment booking system that integrates **Google Calendar API** via Service Accounts and **Brevo API** for automated email notifications and dynamic UPI QR code generation.
- **Developed** an Admin Panel for slot management, securing the application with **Passport.js (OAuth 2.0)**, **Joi validation**, **Helmet security headers**, and **CORS policies**.

Technologies / Skills Used : Node.js, Express.js, MongoDB, Google Calendar API, Brevo API, Passport.js, React

PROJECTS

StochOpt-Engine: Deep Stochastic Optimization System | 🐙 Github

Oct 2023 - Present

Machine Learning Developer(Group Project)

- **Developed** an autoregressive **LSTM network** in **PyTorch** to generate time-series point estimates and predictive variance, effectively capturing seasonal market demand dynamics and addressing data uncertainty.
- **Engineered** a Monte Carlo simulation engine that integrates **LSTM variance** outputs into parallel scenario trajectories, simulating realistic asset and pricing environments.
- **Trained** a Proximal Policy Optimization (PPO) agent using **Stable-Baselines3** to optimize joint pricing and inventory decisions, balancing inventory holding costs, elastic pricing, and stockout penalties.
- **Enhanced** RL agent throughput by utilizing vectorized multi-processing environments (**SubprocVecEnv**) and created an automated model registry pipeline with **Weights & Biases (W&B)** Artifacts for cloud-based versioning and tracking.

Technologies / Tools Used : PyTorch, LSTM, Stable-Baselines3, Weights & Biases (W&B)

WanderLust (Full-Stack Vacation Rental Platform) | 🌐 Live

Oct 2023 - Present

Full Stack Developer

- **Developed** a full stack marketplace platform using **Node.js**, **Express.js**, and **MongoDB** following a scalable **MVC architecture** with RESTful APIs for listings and user management.
- **Implemented** secure authentication and role-based authorization using **Passport.js** with custom middleware to manage listing ownership and access control.
- **Integrated Cloudinary** with **Multer** for optimized image uploads, efficient storage management, and seamless media delivery.
- **Designed** a responsive UI using **EJS templates** and **Bootstrap 5** with dynamic listing rendering, category filtering, and an interactive user experience.

Technologies / Tools Used : Node.js, Express.js, MongoDB, Passport.js, Cloudinary, Multer, EJS, Bootstrap 5

SKILLS

Databases :	MySQL, MongoDB
Frameworks & Libraries :	PyTorch, NumPy, Pandas, Matplotlib, Scikit-Learn, React, Node.js, Express.js, Tailwind CSS, Bootstrap
Languages :	English, Hindi, Marathi, Telugu
Programming Languages :	Python, C++, SQL, JavaScript, C
Coding achievements :	Problem Solving, 200+ Qs LC, 150+ Qs CF maxRating(959)
Tools & Platforms :	Git, Cloudinary, Multer, GitHub, Hoppscotch

POSITIONS OF RESPONSIBILITY

Junior Developer

Nov 2025 - Present

Google Developer Student Club (GDSC)

SVNIT Surat, India

Member
