

BRIJ RADADIYA

+917984162934 radadiyabrij43@gmail.com LinkedIn GitHub Surat, India

PROFESSIONAL SUMMARY

Mathematics & Computing undergraduate at SVNIT Surat with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, and Database Management Systems. Experienced in building scalable full-stack applications using the MERN stack and developing machine learning systems using Python, Scikit-Learn, and XGBoost.

EDUCATION

Sardar Vallabhbhai National Institute of Technology | Surat, India

2024 - 2028

Bachelor of Technology in Mathematics and Computing

CGPA : 9.28 / 10.0

Relevant Coursework: Machine Learning, Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems

PROJECTS

Virtual-Trading-Portfolio-Intelligence-Platform | GitHub

Mar 2026 - Present

Individual Project

- Developed a machine learning-driven virtual trading simulator supporting dual-currency portfolios and automated stock analysis workflows.
- Engineered feature pipelines using **15+ technical indicators**, including moving averages, momentum metrics, and volatility measures for predictive modeling.
- Trained and tuned XGBoost models to forecast stock price movements across **3 prediction horizons (1-day, 7-day, and 30-day)**.
- Evaluated model performance on **5+ years of historical market data** using train-validation splits and MAE/RMSE metrics, outperforming baseline moving-average approaches.
- Designed a full-stack analytics dashboard supporting **real-time tracking of 20+ portfolio and technical-analysis metrics**.

Technologies / Tools Used : React, FastAPI, supabase, XgBoost

Real Estate Investment Analyzer | GitHub Website

Dec 2025 - Jan 2026

Genesis Bootcamp Project

- Developed a hybrid real estate investment analysis platform** that combines **deterministic financial modeling** with LLM-assisted explanations.
- Automated the collection, cleaning, and normalization** of over **1,400+ property listings** through custom web scraping and preprocessing pipelines.
- Implemented a hybrid RAG pipeline** with intent-based routing, directing quantitative queries to **SQLite** and semantic queries to **ChromaDB** using vector embeddings.
- Designed 4+ financial evaluation metrics**, including rental yield, cash flow projections, property appreciation, and a 20-year buy vs. rent wealth analysis.

Technologies / Tools Used : Python, Streamlit, Pandas, SQLite, ChromaDB, OpenRouter (LLM), RAG, BeautifulSoup

MindSettler - Mental Wellness Platform | GitHub Website

Dec 2025 - Jan 2026

GWOC(Google Winter of Code)

- Developed a full-stack **mental wellness platform** that includes appointment scheduling, psycho-educational resources, and an **LLM-powered chatbot** for users and mental health professionals.
- Implemented **secure JWT-based authentication** with distinct user and administrator roles to protect administrative routes and dashboard functionality.
- Designed and integrated over **10 REST APIs** for authentication, appointment management, resource delivery, and platform administration.
- Integrated an **LLM-powered chatbot** using the OpenRouter API to provide conversational guidance and address user queries within predefined non-clinical boundaries.
- Built an **administrative dashboard** to manage users, appointments, and platform resources.

Technologies / Tools Used : Next.js, React.js, Node.js, Express.js, MongoDB, OpenRouter API, Cloudinary, Google Calendar

SKILLS

Machine Learning :	Scikit-Learn, XGBoost, Pandas, NumPy, Matplotlib, LangChain, RAG
Programming Languages :	Python, SQL, JavaScript, C, C++
Databases :	MySQL, PostgreSQL, MongoDB
Web & APIs :	Streamlit, FastAPI, React.js, Next.js, Express.js, Supabase
Tools :	Git, GitHub, Jupyter notebook

AWARDS & ACHIEVEMENTS

- Selected** for Amazon ML Summer School 2026.
- Ranked** in the Top 10 participants in the Odoo Financial Challenge.
- Finalist** in the Genesis Bootcamp.
- Solved** over **500+** DSA problems across various coding platforms.
