

# Nindra Navadeep

+91-9346819494 | nindra.navadeep11@gmail.com | LinkedIn | GitHub

## Education

**Sardar Vallabhbhai National Institute of Technology (SVNIT)**

Surat, India

*Bachelor of Technology in Mathematics and Computing*

2024 – 2028

– CGPA: 9.10 / 10.0

– **Relevant Coursework:** DSA,DBMS, Machine Learning, Artificial Intelligence

## Technical Skills

**Languages:** C++, Python, JavaScript

**Developer Tools:** Jupyter Notebook, GitHub, VS Code,Docker

**Databases & other skills** MySQL, PostgreSQL, MongoDB, FAST API

## Projects

**Dual-Mode AI Lending System | GitHub**

Mar 2026

- Architected a **Dual-Mode Intelligent Lending Platform** integrating specialized evaluation pipelines for **Urban Commercial Banking** (traditional credit metrics) and **Rural Microfinance** (alternative data like annual income, number of dependents etc.)
- Engineered **machine learning models (XGBoost, Random Forest)** trained on Home Credit and localized NGO datasets.Implemented SHAP, translating complex model predictions into an interactive dashboard that surfaces human-readable risk factors (e.g., credit utilization alerts) for loan officers.
- Processed **262 urban** and **70 rural** lending attributes, retraining production models on the **top 20** and **top 15** most predictive features respectively, achieving ROC-AUC scores of **0.7627** and **0.8915**.
- *Tech: Python, React, FastAPI, SQLite, SQLAlchemy, XGBoost, Scikit-Learn, SHAP, Pandas, Tailwind CSS*

**Real Estate Investment Analyzer | View | GitHub**

Dec 2025

- Designed a **deterministic Buy vs. Rent financial simulation engine** with a strict **LLM-as-Explainer architecture**, ensuring zero hallucination by isolating AI from all numeric computations.
- Modeled **RBI-compliant home loan amortization**, 20-year wealth simulations, SIP-based equity returns, and **dynamic Old vs New tax regime optimization** (Sections 24(b), 80C) across annual timelines.
- Implemented a **hybrid Retrieval-Augmented Generation (RAG) pipeline** with **intent-based query routing**, directing quantitative queries to **SQLite** and conceptual queries to **ChromaDB** using embeddings.
- *Tech: Python, Streamlit, Pandas, NumPy, SQLite, ChromaDB, OpenRouter (Gemini Flash), RAG, BeautifulSoup, Jupyter*

**MindSettler – Full Stack Mental Wellness Platform | View | GitHub**

Jan 2026

- Developed a **privacy-first mental wellness platform** delivering psycho-educational content, AI-assisted guidance, and therapist session booking without performing medical diagnosis.
- Architected a **scalable full-stack system** using **Next.js, Node.js, and Express**, implementing secure authentication, role-based access control, appointment scheduling workflows, and an admin management dashboard.
- Integrated an **LLM-powered conversational assistant** via OpenRouter for guided user navigation and mental health resource discovery, with strict non-clinical boundaries.
- *Tech: Next.js, React, Node.js, Express, MongoDB, OpenRouter API, Tailwind CSS, Framer Motion, Cloudinary*

## Achievements and Competitive Programming

- Selected for **Amazon ML Summer School (MLSS) 2026**
- **Flipkar Grid 8.0** semi-finalist
- **LeetCode** – Solved **500+** DSA problems with a maximum contest rating of **1837**.

## Position of Responsibility

**Association for Computing Machinery (ACM), SVNIT**

Surat, India

*Executive Member*

2025 – Present

- Actively contributing to technical events, coding workshops, and peer learning initiatives within the ACM student chapter.
