EDUCATION

- Sardar Vallabhbhai National Institute of Technology, Surat** *Expected 2028*
B.Tech in Mathematics & Computing CGPA: 9.05
- Vedaant Multipurpose School** *2024*
Central Board of Secondary Education Percentage: 94.8

PERSONAL PROJECTS

- InSpend: Smart Personal Finance Tracker** [GitHub](#) | [APK](#)
A mobile-first personal finance application focused on budgeting, savings, and spending analysis.
 - Tech Stack:** React Native (Expo), TypeScript, Firebase (Firestore, Auth), MMKV, Reanimated
 - Developed a multi-user mobile application using **React Native (Expo)** and **Firebase** to track income, expenses, and savings.
 - Implemented savings goal locking, budget rollover, and recurring transaction logic to promote disciplined spending habits.
 - Built interactive analytics and insights to visualize spending patterns across different time ranges.
- Joy Juncture (GWoC)** [GitHub](#) | [Live](#)
A design-first, experience-driven full-stack web platform prioritizing minimal UI and secure architecture.
 - Tech Stack:** Next.js, TypeScript, Tailwind CSS, PostgreSQL, Prisma ORM, Auth.js
 - Developed a responsive, design-first frontend using **Next.js App Router** and **Tailwind CSS**, focusing on an optimized, clutter-free user experience.
 - Architected a secure backend utilizing **Next.js Server Actions**, **Auth.js** for session management, and **Prisma ORM** for type-safe database operations.
 - Implemented a backend-driven wallet logic and personalized profiles, ensuring a strict separation between UI components and business logic.
- Classroom-X** [GitHub](#)
A Virtual Classroom-style web app and study tracker demonstrating core OOP principles in Python.
 - Tech Stack:** Python, Flask, SQLAlchemy, Flask-Login, Tailwind CSS, SQLite, Pytest, Jinja2
 - Designed an OOP-driven domain hierarchy with an abstract **UserBase** and role-specific **Teacher/Student** behaviors utilizing encapsulation, inheritance, and polymorphism.
 - Architected a layered system with thin controllers and dedicated services for business logic, utilizing dependency injection for database sessions.
 - Implemented end-to-end workflows including class creation via access codes, assignment distribution, student submissions, and teacher grading.
 - Secured the application using **Flask-Login** and **Flask-Bcrypt** for user authentication and role-based access control.

TECHNICAL SKILLS AND INTERESTS

Languages: C, C++, Python, HTML, CSS, JavaScript, TypeScript

Developer Tools: Git, GitHub, VS Code

Frameworks: Flask, React, Next.js, Tailwind CSS

Databases: MySQL, PostgreSQL, Prisma ORM, SQLite

Soft Skills: Problem Solving, Debugging, Team Collaboration, Time Management

Coursework: Data Structures and Algorithms, Object-Oriented Programming, Discrete Mathematics, Linear Algebra, Number Theory, Numerical Analysis

Areas of Interest: Backend Development, Mobile App Development, Competitive Programming, System Design

POSITIONS OF RESPONSIBILITY

- Executive Member** ACM Student Chapter, SVNIT *Sept 2025 – Present*
- Publicity Co-Head** Mindbend — Annual Technical Festival, SVNIT *Nov 2025*

ACHIEVEMENTS

- District Topper** Secured highest rank in district in Class 10 Board Examination *2022*
- School Topper** Secured highest rank in school in Class 12 Board Examination *2024*
