EDUCATION

Sardar Vallabhbhai National Institute of Technology (SVNIT)
B.Tech in Mathematics and Computing, CGPA: 7.78

Expected May 2028
Surat, India

SUMMARY

Strong foundation in Python, Java, C++, and core computer science fundamentals including Data Structures, Algorithms, and Object-Oriented Programming, with hands-on experience building full-stack applications using React.js, Node.js, and Express.js. Built a production-ready Generative AI job preparation platform, integrating the Gemini API for resume parsing, ATS scoring, skill-gap detection, and interview question generation, backed by secure JWT authentication and RESTful API design. Experienced in designing scalable systems with MongoDB, PostgreSQL, and Firebase, deploying applications on Vercel, Railway, and Firebase Hosting, and collaborating using Git and GitHub in agile, fast-paced development workflows. Passionate about problem-solving, clean code, and building reliable, user-centric software products.

RELEVANT COURSEWORK

- | | | |
|-----------------------|---------------------------|--------------------------------------|
| • Data Structures | • Artificial Intelligence | • Systems Programming |
| • Database Management | • Operating Systems | • Computer Networks |
| • Numerical Analysis | • Linear Algebra | • Probability & Statistical Learning |

PROJECTS

AI-Powered Job Preparation Platform | *React, Node.js, Express.js, JWT, Gemini API, Puppeteer*

- **Built** a production-ready full-stack **Generative AI** platform using **React**, **Node.js**, and **Express.js**, enabling users to upload resumes, analyze job descriptions, and detect skill gaps.
- Integrated the **Gemini API** for resume parsing, skill extraction, and AI-based skill-gap and interview question generation; secured the app with **JWT** authentication and token blacklisting.
- Developed ATS-optimized resume generation using **Puppeteer** for dynamic PDF creation, backed by structured **REST APIs** across the stack.
- Designed a responsive, mobile-first interface with real-time feedback and progress tracking, using asynchronous API calls and optimized state management to reduce resume review turnaround time.

Rabuste Cafe : Full-Stack Coffee Shop | *React, TypeScript, Vite, Tailwind CSS, Firebase, Firestore*

- Developed a responsive coffee shop website with menus, workshops, and events using reusable **React + TypeScript** components and integrated **Firebase Authentication** and **Cloud Firestore** for secure user management.
- Implemented client-side routing and REST API integration, deployed via **Firebase Hosting**, and managed the codebase with **Git and GitHub**.
- Optimized application performance through code-splitting and lazy loading, maintaining a clean, modular component architecture for long-term scalability and maintainability.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, SQL

Core Concepts: RAG, SDLC, Generative AI, Full-Stack Development, JWT Authentication, Docker & Containerization

Frameworks & Libraries: React.js, Node.js, Express.js, FastAPI, SQLAlchemy

Databases: MongoDB, PostgreSQL, MySQL, Supabase

Cloud & Dev Tools: Firebase, Railway, Vercel, Docker, Git, GitHub, Postman, VS Code, Linux

TECHNICAL COMPETITIONS & ACHIEVEMENTS

- Secured a Top 5 finish at **Finnovate Hack 2025**, conducted by Adani Enterprises at IIT Gandhinagar, collaborating with a team to design and prototype a technology solution under competitive time constraints.
- Contributed to **Google Winter of Code 2025**, engaging in open-source software development and collaborative engineering practices.
- Competed in **Strategix 2025**, applying analytical thinking and technical problem-solving to address real-world challenges.
