Objective

Motivated undergraduate student with a strong interest in software and game development, seeking opportunities to participate in hackathons and collaborative projects to build practical solutions, strengthen problem-solving skills, and gain hands-on experience with modern technologies.

Technical Skills

Programming Languages: Python, C, C++, SQL

Libraries & Frameworks: Pygame, NumPy, Pandas, Matplotlib, LangChain

Tools & Platforms: Git, GitHub, VS Code

Core Concepts: Object-Oriented Programming, Data Structures, Algorithms, Computer Network

Project

Project Name

StochOpt: Deep Stochastic Optimization Engine

Jan 2026 – Feb 2026

Python, PyTorch, Stable-Baselines3, PPO, W&B, DevOps Automation

github.com/adityamedpalliwar/StochOpt-Engine

- Contributed to a stochastic optimization platform for dynamic pricing and inventory management.
- Built and optimized reinforcement learning environment pipelines for PPO-based agent training and evaluation.
- Developed automation workflows for model downloading, artifact synchronization, and evaluation setup using W&B Artifacts.

Dungeon Crawler RPG Engine

Python, Pygame

Sept 2025 – Oct 2025

<https://github.com/Heet-07/RPG-game>

- Developed a 2D side-scrolling action RPG with physics-based movement, enemy AI, collision handling, and modular level architecture using object-oriented design.

Education

Sardar Vallabhbhai National Institute of Technology

2024 – Present

B.Tech in Mathematics and Computing

Surat, India

Semester: 5th

CGPA: 8.94

Soft Skills

Problem-solving, analytical thinking, Time management and task prioritization, Willingness to learn and experiment quickly
