Artificial Intelligence Undergraduate @ SVNIT Surat

Profile

Artificial Intelligence undergraduate at SVNIT Surat with strong foundations in Data Structures & Algorithms, Operating Systems, DBMS, and Computer Networks. Experienced in building backend systems, REST APIs, and scalable software solutions with a focus on problem-solving and efficient implementation.

Technical Skills

Programming: C, Python, JavaScript, SQL

Core CS: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

Web: React.js, Node.js, Express.js

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, Linux, VS Code

Libraries: NumPy, Pandas, Scikit-learn

Projects

Legality AI & Red Flag Detector | Python, FAISS, REST APIs

2026

- Developed a document processing pipeline for extracting, indexing, and retrieving relevant legal clauses from PDF documents.
- Built backend APIs for semantic search, clause ranking, and automated report generation with highlighted risk sections.
- Implemented retrieval workflows using embeddings and similarity-based ranking for efficient document analysis.

Rabuste Cafe | React.js, Node.js, Express.js, MongoDB

2026

- Developed responsive frontend components and integrated REST APIs for dynamic menu management and user interaction.
- Implemented backend CRUD operations, database models, and API endpoints for category and item management.
- Managed frontend-backend integration with structured database workflows for scalable content updates.

Grid Vision | React, FastAPI, XGBoost, SHAP

2026

- Built preprocessing pipelines and backend services for energy consumption forecasting and analytics.
- Developed an interactive dashboard with model insights and explainability using SHAP-based analysis.

Education

Sardar Vallabhbhai National Institute of Technology (SVNIT)

Aug 2024 – Present
Surat, India

Bachelor of Technology in Artificial Intelligence

- Current CGPA: **9.10/10.0**

Achievements

Winner - GENESIS 2026 Product-Building Hackathon

Dec 2025 – Jan 2026

Organized by CEV, ACM, and GDGC

- Won 1st Place for **Legality AI**, a document retrieval and analysis system with backend processing pipelines and automated report generation.

Runner Up - PowerMind Hackathon

May 2026

Adani Group x CDC SVNIT

- Developed an energy forecasting platform with preprocessing pipelines, backend integration, dashboard visualization, and explainable model insights.

Competitive Programming

2025 – Present

LeetCode & Codeforces

- **LeetCode Rating: 1642** with **450+ Data Structures and Algorithms problems solved** across Graphs, Dynamic Programming, Trees, Binary Search, Greedy, and Hashing.
- **Codeforces Rating: 1272**, demonstrating strong algorithmic problem-solving skills in competitive programming contests.
