+91-9861728613 | soumenmohanty.2005@gmail.com | [GitHub](#) | [LeetCode](#) | [Codeforces Profile](#)

EDUCATION

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat

Bachelor of Technology in Electronics & Communication Engineering | Exp. May 2028

- CGPA: 8.65 / 10.0
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), Digital Logic.

TECHNICAL SKILLS

- **Languages:** C++ (Strong), JavaScript (ES6+), HTML5, CSS3, Python(Basic).
- **Libraries/Frameworks:** Node.js, Express.js, MongoDB (Mongoose), React.js, Bootstrap 5, EJS.
- **Tools:** Git, GitHub, VS Code, Postman, REST APIs.
- **Core Concepts:** MVC Architecture, DOM Manipulation, RESTful Routing, Operating Systems.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- **LeetCode:** Rated 1,661 (Top 16.99% Globally). Solved 450+ problems (119 Easy, 268 Medium, 67 Hard).
- **Codeforces:** Active participant with a Max Rating of 1125. Consistent problem solver in Div 2/3 contests.
- **Algorithmic Proficiency:** Strong grasp of Arrays, Linked Lists, HashMaps, Graphs and Dynamic Programming.

PROJECTS

Wanderlust (Full Stack Rental Marketplace) | Node.js, Express.js, MongoDB, Bootstrap, EJS | [Live Demo](#) | [Github](#)

- **Architected a comprehensive MVC application** for a global rental marketplace, engineering a robust RESTful API with strict Joi data validation to ensure MongoDB database schema integrity.
- **Integrated secure user authentication** via Passport.js, enabling role-based access control (RBAC) for property owners and guests to securely manage listings, bookings, and reviews.
- **Developed an end-to-end reservation system** featuring dynamic price calculation and secure, encrypted payment processing utilizing the Stripe Checkout API.
- **Implemented interactive forward-geocoding maps** using the Mapbox GL API to dynamically visualize property locations based on user-submitted addresses.
- **Built complex MongoDB aggregation and population queries** to generate real-time, personalized "My Trips" dashboards tracking user booking histories.
- Deployed the application to production on the Render cloud platform, configuring environment secret injection, session management, and a cloud-hosted MongoDB Atlas cluster.

Simon Says (Interactive Pattern Game) | JavaScript, DOM, CSS3 | [Github](#)

- Developed a dynamic pattern-memory game using pure JavaScript DOM manipulation without external frameworks.
- Implemented complex state management logic using arrays to track game history vs. user input sequences.
