B.Tech Artificial Intelligence, SVNIT Surat | CGPA **8.00**/10 | 2024–28

Target: GE HealthCare — Edison Internship Development (EID) 2027 | **Software (SW)**

SUMMARY

Second-year **B.Tech Artificial Intelligence** student at **SVNIT Surat** with strong foundations in **C/C++**, **Python**, **object-oriented design**, and **data structures & algorithms**. Builds and ships full-stack software end-to-end — requirements, design, implementation, debugging, and deployment — using **Django**, **React**, and **JavaScript**. Demonstrated leadership as Web Wonder **Team Lead (Finalist)** and departmental coordination at Nexus, SVNIT. Seeking the **GE HealthCare EID Software** internship to contribute to live engineering projects in a medical-technology environment and grow toward the **Edison Engineering Development Program (EEDP)**.

EDUCATION

Sardar Vallabhbhai National Institute of Technology, Surat

2024–28

Bachelor of Technology — Artificial Intelligence

CGPA: **8.00**/10

- **Relevant coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Software Engineering
- **DSA practice:** Active on LeetCode (**Rawat_987**) — arrays, hashing, strings, and problem-solving under time constraints

TECHNICAL PROJECTS

EduAce — AI-Assisted Study Platform

Live

Python, Django, HTML/CSS | REST-style web flows

Full-stack web application that delivers personalized academic planning and AI-assisted study support in a single product.

- Designed and implemented end-to-end application flows for study planning and academic productivity (backend logic + web UI).
- Built modular Django components for request handling, data persistence, and interactive user workflows; iterated based on usability feedback.
- Practiced software lifecycle habits: feature scoping, debugging production-like deploy issues on Render, and documenting usage for end users.

Beneath The Blue — Interactive Awareness Platform

Live

Python, Django, JavaScript, Bootstrap, HTML/CSS

Django-based platform for ocean and marine-life conservation awareness with interactive learning modules.

- Implemented **user authentication**, session-aware access, **dynamic quiz generation**, and **score tracking** for measurable engagement.
- Developed responsive front-end interfaces and integrated them with server-side logic; validated edge cases in auth and quiz scoring.
- Demonstrates ability to own a complete software feature set — UI, backend rules, and reliability under real user interaction.

EXPERIENCE & LEADERSHIP

Web Wonder Program — Team Lead (Finalist)

- Led a team of four through design, implementation, and demo of a production-ready web product (Beneath The Blue).
- Owned feature planning, task breakdown, integration checkpoints, and final technical presentation — mirroring agile team delivery.
- Secured **Finalist** placement among competing teams for real-world problem solving and execution quality.

Academic Web Development Project — Frontend Developer

- Built responsive UI modules with HTML, CSS, JavaScript, and Bootstrap for a faculty-assigned web system.
- Collaborated with backend teammates to integrate front-end views with application APIs/logic; debugged cross-layer issues.

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript, HTML/CSS

Core CS: Data Structures & Algorithms, Object-Oriented Design, Debugging, Problem Decomposition

Frameworks & Libraries: Django, React.js, C++ STL, Bootstrap

Backend & Data: REST-style web APIs, MongoDB, MySQL, authentication & session flows

Tools: Git, GitHub, VS Code, Node.js, cloud deploy (Render)

Interests: Software engineering for reliable systems, full-stack development, competitive programming, **healthcare technology software**

POSITIONS OF RESPONSIBILITY

Departmental Representative

2026–Present

Nexus — Dept. of CSE & AI, SVNIT

- Coordinate between students and organizers for departmental technical events; practice clear stakeholder communication.
- Support planning and execution of technical/cultural programs — ownership, timelines, and team follow-through.
