Roll No.: U24AI035 | +91-9305571846 | vanshrawat385@gmail.com | GitHub | LinkedIn | LeetCode

B.Tech Artificial Intelligence, SVNIT Surat | CGPA **8.00**/10 | 2024–28

Target: GE HealthCare — Edison Internship Development (EID) 2027 | **Software (SW)**

SUMMARY

Second-year **B.Tech Artificial Intelligence** student at **SVNIT Surat** with strong foundations in **C/C++**, **Python**, **object-oriented design**, and **data structures & algorithms**. Designs, develops, tests, and debugs full-stack software end-to-end — from requirements through deployment — using **Django**, **React**, and **JavaScript**. Collaborated on **LogiFlow** (Google Solution Challenge 2026); led a Web Wonder team to **Finalist**; departmental coordination at Nexus, SVNIT. Seeking the **GE HealthCare EID Software** internship to contribute to reliable healthcare-technology software and grow toward the **Edison Engineering Development Program (EEDP)**.

EDUCATION

Sardar Vallabhbhai National Institute of Technology, Surat

2024–28

Bachelor of Technology — Artificial Intelligence

CGPA: **8.00**/10

- **Relevant coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Software Engineering
- **DSA practice:** Active on LeetCode (**Rawat_987**) — arrays, hashing, strings, trees, timed problem-solving
- **School:** S.D. Memorial Public Inter College, Lucknow — Class XII **89%** (2024), Class X **92.33%** (2022), UP Board

TECHNICAL PROJECTS

LogiFlow — Multi-Modal Logistics Decision Platform

Google Solution Challenge 2026

*Python, FastAPI, TypeScript, Next.js, REST APIs | Team of 4 | **GitHub** | **Live***

Decision-intelligence platform that compares road, rail, air, water, and hybrid cargo routes with priority-weighted scoring and Pareto ranking.

- Collaborated in a **4-member** team on design, implementation, debugging, and demo of end-to-end multimodal route comparison flows.
- Contributed full-stack feature work across web UI and API-backed workflows; practiced integration testing, edge-case validation, and Git-based collaboration (Vercel / Cloud Run).

EduAce — AI-Assisted Study Platform

Live

Python, Django, HTML/CSS | REST-style web flows

Full-stack web application for personalized academic planning and AI-assisted study support.

- Designed and implemented end-to-end study-planning flows spanning backend logic, data persistence, and interactive web UI.
- Built modular Django components for request handling and user workflows; debugged production-like deploy issues on Render.

Beneath The Blue — Interactive Awareness Platform

Web Wonder Finalist

*Python, Django, JavaScript, Bootstrap, HTML/CSS | **Live***

Django-based platform for ocean and marine-life conservation awareness with interactive learning modules.

- Implemented **user authentication**, session-aware access, **dynamic quiz generation**, and **score tracking**.
- Built responsive front-end interfaces integrated with server-side logic; validated edge cases in auth and quiz scoring.

EXPERIENCE & LEADERSHIP

Web Wonder Program — Team Lead (Finalist)

- Led a team of four through design, implementation, and demo of Beneath The Blue; owned planning, integration checkpoints, and final presentation.
- Secured **Finalist** placement for real-world problem solving and execution quality under deadlines.

Departmental Representative — Nexus (Dept. of CSE & AI, SVNIT)

2026–Present

- Coordinate students and organizers for departmental technical/cultural events; practice stakeholder communication and delivery under timelines.

Academic Web Development Project — Frontend Developer

- Built responsive UI modules (HTML, CSS, JavaScript, Bootstrap) and integrated them with backend logic; debugged cross-layer issues.

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript, HTML/CSS

Core CS: Data Structures & Algorithms, Object-Oriented Design, Debugging, Problem Decomposition

Frameworks & Libraries: Django, React.js, Next.js (exposure), C++ STL, Bootstrap

Backend & Data: REST-style web APIs, MongoDB, MySQL, authentication & session flows

Tools: Git, GitHub, VS Code, Node.js, cloud deploy (Render, Vercel)

Interests: Reliable software systems, full-stack development, competitive programming, **healthcare technology software**

ACHIEVEMENTS

- **Google Solution Challenge 2026** — LogiFlow (4-member engineering team)
- **Finalist**, Web Wonder Competition — *Beneath The Blue* (Team Lead)
