**eBay University Recruiting**  
Data Science  
Bengaluru, Karnataka, India

**Re: Data Science Intern — Bengaluru (Hybrid) | Class of 2028**

Dear eBay Data Science Hiring Team,

I am applying for the Data Science Intern role in Bengaluru. I am a penultimate-year B.Tech Artificial Intelligence student at SVNIT Surat (CGPA 9.20/10, graduating 2028) with strong analytical skills in SQL and Python, and a track record of turning large structured datasets into models, metrics, and clear recommendations. I am excited by eBay's mission to connect buyers and sellers at global scale, and by the chance to apply experimentation-minded analysis and prototype machine learning to product decisions that affect millions of users.

At IFFCO, I queried and prepared operational MySQL/SQL datasets for reporting and automation across 50+ daily workflows, reviewing data quality before production use and partnering with cross-functional stakeholders to translate ambiguous needs into reliable tooling. That experience reinforced root-cause thinking, attention to detail, and communicating technical findings to non-technical partners.

On LogiFlow (Google Solution Challenge 2026, Global Top 106), I led predictive analytics on 15,650 train-day records: exploratory analysis, feature engineering, and Gradient Boosting prototypes with cross-validation (MAE 22.7 minutes; 81% within 30 minutes). I used multi-criteria ranking (cost, time, risk) to support product-style decisions and locked data integrity with 100/100 automated business-rule validations—an experimental loop of define metric, evaluate, iterate. On Community Hero (Vibe2Ship 2026, Global Top 20), I built a categorization pipeline over noisy user-submitted data using Firestore (NoSQL) and turned unstructured reports into routing insights for decision-making.

I bring proficiency in SQL and Python (Pandas, NumPy, Scikit-learn), coursework in probability, statistics, and machine learning, familiarity with NoSQL stores (Firestore), and strong communication through mentoring (ACM SVNIT / Nexus) and the McKinsey.org Forward Fellowship. I would welcome the opportunity to contribute to eBay's Data Science team this summer—sampling data, building models, and presenting insights that shape products. Thank you for your consideration.

Sincerely,  
**Ojas Srivastava**
