Bank of America Campus Recruiting
Global Corporate & Investment Banking
Mumbai, India

Re: Global Investment Banking Summer Analyst — 2027 | Mumbai

Dear Recruiting Team,

I am applying for the Global Investment Banking Summer Analyst program in Mumbai (Program ID 14534) for Summer 2027. I am a penultimate-year B.Tech Artificial Intelligence student at SVNIT Surat (CGPA 9.20/10, graduating May 2028), available for the full 10-week internship from June to August 2027, and seeking 2028 full-time conversion. I am dedicated to building a career in investment banking and drawn to Bank of America's Global Investment Banking platform—advisory, capital raising, and integrated solutions for complex clients—where quantitative rigor, client focus, and high-quality execution matter every day.

I bring strong quantitative/analytical skills, attention to detail, and client-focused delivery. At IFFCO, I partnered with operations stakeholders to ship tools that automated 50+ daily workflows, managed several workstreams at once, and communicated trade-offs clearly in writing and presentations to technical and non-technical audiences—learning quickly under changing requirements. On LogiFlow (Google Solution Challenge 2026, Global Top 106), I co-led quantitative modeling and stakeholder presentations: multi-scenario analysis across cost, time, and risk, with structured validation and decks for judges—skills that transfer to research, analysis, and client presentation materials. I am building familiarity with risk/return concepts and am committed to deepening accounting and valuation fundamentals on the job.

Beyond academics, I have shown assertiveness, initiative, leadership, and team focus as a McKinsey.org Forward Fellow (2026), ACM SVNIT Executive Member, Nexus mentor, and Technical Co-Lead on a Global Top 106 team. I am fluent in English and Hindi (an additional Asian language), comfortable with change, and energized by high standards. I would be grateful for the chance to support a coverage or product team this summer—contributing to analysis, research, and presentation materials while learning from Bank of America's bankers. Thank you for your consideration.

Sincerely,
Ojas Srivastava
