Quantitative Research Intern (2028 Graduates) | Gurugram

B.Tech Artificial Intelligence, SVNIT Surat | CGPA **9.20/10** | Expected graduation **May 2028** | Available for 8-week on-site internship

Summary

Penultimate-year **B.Tech Artificial Intelligence** student (Computer Science-related) at SVNIT Surat, CGPA **9.20/10**, graduating **2028**. Strong foundation in **probability, statistics, linear algebra**, and **machine learning**; builds predictive models end-to-end—hypothesis, feature design, cross-validated evaluation, and iteration. Comfortable with **Python** (and **C++**) on large structured datasets. Drawn to open-ended research problems where better questions and rigorous evidence drive decisions.

Education

Bachelor of Technology in Artificial Intelligence

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India

CGPA: 9.20/10

Aug 2024 – May 2028

- **Eligibility:** Pursuing bachelor's degree; expected graduation **2028**; CGPA **9.20/10** (above 8.5); no active backlogs
- **Relevant Coursework:** Probability & Statistics, Linear Algebra, Machine Learning, Data Structures & Algorithms, DBMS, Operating Systems
- **Mathematical & CS foundation:** Discrete math and algorithmic problem solving through competitive programming (Python / C++)

Research-Oriented Projects

LogiFlow — Predictive Modeling on Large-Scale Operational Data

Apr 2026 – Present

Python, Scikit-learn, Pandas, NumPy, feature engineering, cross-validation, pytest

GitHub | Live

- Framed delay risk as a **research question**; engineered features from timetable, route, and delay history on **15,650 train-day** records; trained **Gradient Boosting** models with cross-validation (**MAE 22.7 min, 81%** within 30 min).
- Designed **experimental** train/validation loops and a **100/100** automated validation suite—hypothesis → model → evaluation with measurable error metrics.
- Built analytical tooling for corridor pricing, Pareto ranking, and model explainability; **Google Solution Challenge 2026 Global Top 106** (Technical Co-Lead, Neural Foundry).

Community Hero — Categorization & Noisy Data Pipeline (Vibe2Ship 2026, Global Top 20)

Jun 2026

Python, TypeScript, Firebase/Firestore, Gemini API

GitHub

- Built an AI categorization pipeline over messy user-submitted reports; defined quality criteria, handled noisy inputs, and surfaced routing/priority insights.
- Solo-owned problem framing through shipped product and demo—hypothesis-driven iteration under a fixed timeline.

AirHelp — AI-Assisted Analysis & Retrieval Systems

2026

Python, FastAPI, RAG, embeddings, NumPy, WebSockets

GitHub

- Built an AI-assisted research-style workflow: semantic retrieval, intent routing, and low-latency backends (1–3s) for querying structured + unstructured knowledge—**PowerMind Hackathon 2026**.

Experience

Software Engineering Intern

IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj, India

Jun 2025 – Jul

2025

- Prepared and queried operational **datasets** (MySQL/SQL) for reporting and workflow automation (**50+** daily processes); reviewed data quality before production use.
- Delivered production **Node.js/MySQL** services with testing and iterative feedback—ownership from problem framing through deployment on **Linux**.

Technical Skills

Languages: Python, C/C++, SQL, TypeScript/JavaScript

Quantitative Research & ML: Statistical modeling, feature engineering, Gradient Boosting, cross-validation, time-series-style structured data, Scikit-learn, Pandas, NumPy, experimental design

Data & Tooling: Large structured datasets, SQL, pytest, data quality checks, FastAPI, Git, Linux

Foundations: Probability & statistics, linear algebra, algorithms & data structures, analytical problem solving

Achievements

- **LeetCode Knight:** Max rating **2048, 711+** problems — rigorous algorithmic and quantitative problem solving
- **Codeforces Specialist:** Max rating **1419, 252+** solved (profile)
- **Google Solution Challenge 2026 — Global Top 106; Vibe2Ship 2026 — Global Top 20**
- **Executive Member, ACM SVNIT & Mentor, Nexus SVNIT** — communicates technical ideas clearly; continuous learning mindset
