slice Hiring Team
Technology — Bengaluru

Re: SDE Intern

Dear Hiring Team,

I am applying for the SDE Intern role at slice in Bengaluru. I am a B.Tech Artificial Intelligence student at SVNIT Surat (CGPA 9.20/10, graduating May 2028) with a genuine passion for coding and for how AI tools like Cursor and Claude change the way software gets shipped. Your posting matches how I already work: real ownership after minimal onboarding, strong fundamentals, and AI-assisted development used to move faster—not as a substitute for judgment.

I use Cursor daily as my primary IDE, including Agent and Composer for multi-file work, plus Claude for structured prompting. My loop is deliberate: write a clear spec (API contracts, edge cases, acceptance criteria), let AI accelerate scaffolding, tests, and repetitive engineering tasks, then review every diff before it ships. Architecture, auth, and production data stay human-owned. That is exactly the “using AI, not building AI/ML models” focus you describe.

At IFFCO, I shipped production Node.js/Express/MySQL tools that automated 50+ daily workflows and 10+ REST APIs—working independently with mentor check-ins, not step-by-step hand-holding. On LogiFlow (Google Solution Challenge 2026, Global Top 106), I co-led backend shipping on GCP Cloud Run with Redis-backed paths and a 100/100 pytest suite, using Cursor/Claude to draft tests after locking contracts. I also solo-shipped Community Hero (Vibe2Ship 2026, Global Top 20) and AirHelp under hackathon pressure. Outside projects, I am a LeetCode Knight (2048, 744 solved) and Codeforces Specialist (1419).

I am excited by slice’s mission to make banking fast, transparent, and feel good—products I would use myself. I want a front-row seat on a fast-moving fintech team that trusts interns with real problems early. I would be grateful for the chance to contribute in Bengaluru.

Thank you for your consideration.

Sincerely,
Ojas Srivastava
