Pre-final year | B.Tech Artificial Intelligence, SVNIT Surat | CGPA **9.20/10** | Graduating **May 2028**
Systems Intern — D. E. Shaw India

Education

SVNIT Surat	B.Tech — Artificial Intelligence	9.20 CGPA	2024–Present
Shiv Jyoti Convent School, Kota	12th (CBSE)	95.80%	2024
St. Joseph's College, Prayagraj	10th (ICSE)	97.20%	2022
<i>Coursework:</i> Operating Systems, Computer Organization & Architecture, DBMS/SQL, DSA, Design & Analysis of Algorithms, OOP, Computer Networks, Software Engineering. No active backlogs.			

Experience

Software Engineering Intern

Jun–Jul 2025

IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj

- Built production tools with **Node.js**, **Express**, and **MySQL** that automated **50+ daily** operational workflows for plant stakeholders.
- Developed **10+ REST APIs** with input validation and structured error handling; debugged broken flows using logs and stack traces.
- Used **Git**, **Docker**, and **CI/CD** before deployment; wrote short docs and updated mentors/managers on progress and trade-offs.

Projects

LogiFlow — Google Solution Challenge 2026 (Global Top 106)

Apr–Jun 2026

Python, FastAPI, TypeScript, Next.js, Redis, SQL, GCP Cloud Run, pytest | GitHub | Live

- Technical Co-Lead: designed REST APIs in **FastAPI** and a **Next.js** frontend so route/decision results were queryable and visible in a live web app.
- Built SQL/Python pipelines over **15,000+** train-day records—cleaning, joining, and validating inputs before they reached the services.
- Added **Redis** caching for frequently read corridor/route data; deployed backend services on **GCP Cloud Run**; measured hot-path reads around **100–400 ms** after caching.
- Wrote a **pytest** regression suite with **100/100** business-rule checks so broken pricing/routing logic fails in CI before release; documented API endpoints for teammates.
- Coordinated backend/frontend workstreams under a fixed contest deadline; used Cursor/Claude only to draft boilerplate, then reviewed and owned merges.

Community Hero — Vibe2Ship 2026 (Global Top 20)

Jun 2026

TypeScript, React, Express, Firebase, Gemini API, GCP Cloud Run | GitHub | Live

- Solo-owned end-to-end delivery: React/Express app, Firebase/**Firestore** data model, Cloud Run deploy, and live demo for a global Top-20 finish.
- Implemented geo-tagged citizen reporting and an admin review panel; wrote API handlers with validation for empty/noisy submissions.
- Integrated **Gemini API** for report categorization with guard checks so bad model output does not break routing; exercised mobile-friendly UI paths before release.

AirHelp — PowerMind Hackathon 2026

2026

Python, FastAPI, React, WebSockets | GitHub

- Built a FastAPI backend and React UI for airport-style Q&A using a retrieval pipeline over structured + unstructured knowledge.
- Added **WebSocket** channels for live-style alerts; iterated indexing/chunking when answers were wrong or slow.
- Load-tested with about **50–100** concurrent users (roughly **1–3s** responses) and fixed bottlenecks found during the hackathon.

Skills

Languages: C, C++, Python, Java, SQL, TypeScript, JavaScript

Core CS: Operating Systems, Computer Organization & Architecture, DBMS, DSA, OOP, Computer Networks

Backend & Data: REST APIs, FastAPI, Node.js/Express, MySQL, Redis, Firebase/Firestore, SQL/Python validation

Frontend & Deploy: React, Next.js, GCP Cloud Run, Docker, CI/CD, Linux basics, Git, pytest

AI coding tools: Cursor, Claude (drafting aid; I review and own final code)

Achievements & Leadership

- LeetCode Knight:** peak **2048**, **744** solved, 32 contests; **Codeforces Specialist:** **1419**, **265** solved
- Google Solution Challenge 2026 — Global Top 106; Vibe2Ship 2026 — Global Top 20**
- Chairperson, Nexus SVNIT** — departmental technical cell; workshops/mentoring for **500+** students
- Executive Member, ACM SVNIT; McKinsey.org Forward Fellow (2026)**
