SDET Intern — slice Quality Engineering | Bengaluru (On-Site)
B.Tech Artificial Intelligence, SVNIT Surat | CGPA **9.20/10** | Graduating **2028**
Cursor + **Claude** for AI-driven test authoring | pytest automation

Summary

Quality Engineering-minded engineer: turns requirements into test cases, validates APIs/data, automates regressions with **pytest**, and partners with developers on root-cause. Daily **Cursor/Claude** user who applies **prompt engineering** to draft tests, fixtures, and CI checks faster—then manually reviews edge cases. Strong **Python/Java** OOP, **SQL/MySQL**, **Git**, shell. Excited by **fintech** and user-first quality.

AI Tools for Testing Efficiency

- **Cursor power-user:** Agent/Composer for generating pytest cases, fixtures, and validation helpers from acceptance criteria; inline edit for hardening failing assertions.
- **Claude + prompt engineering:** Structured prompts (given/when/then, boundary cases, negative paths) to expand coverage quickly without skipping human review.
- **Workflow:** Spec → AI draft suite → run → fix flakes → merge—using AI to improve automation efficiency and reliability, not to skip judgment.

Education

Bachelor of Technology in Artificial Intelligence CGPA: 9.20/10
Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India Aug 2024 – May 2028

- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, DBMS/**SQL**, Operating Systems, Computer Networks, Design & Analysis of Algorithms

Experience

Software Engineering Intern — Quality & Delivery Focus Jun 2025 – Jul 2025
IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj, India

- Built and validated **10+ RESTful APIs** (Node.js/Express, **MySQL/SQL**)—translated requirements into acceptance checks, input validation, and error handling before production.
- Performed **data-quality** reviews (missing fields, duplicates, validation rules) on SQL datasets for **50+ daily** workflows; reported bugs and collaborated on fixes.
- Unit/integration testing, debugging, peer **code review**, **Git**, **Docker**, **CI/CD** in a collaborative agile-style team.

Projects — Testing, Automation & Product Quality

LogiFlow — pytest Automation Framework (Google Solution Challenge 2026, Global Top 106) Apr 2026 – Jun 2026
Python, pytest, FastAPI, SQL, Redis, Cursor, Claude GitHub | Live

- Designed/maintained **pytest** regression suite with **100/100** automated business-rule validations for web APIs and data pipelines before release.
- Used **Cursor Agent** + **Claude** to scaffold tests from contracts, then manually added negative cases and reviewed for false greens.

Community Hero — E2E Product Validation (Vibe2Ship 2026, Global Top 20) Jun 2026
TypeScript, React, Express, Firebase, API validation, GCP Cloud Run GitHub | Live

- Solo-owned shipped web/PWA: defined quality criteria, validated API/admin flows, exercised mobile-friendly paths before deploy.

AirHelp — Load & Reliability Evaluation (PowerMind Hackathon 2026) 2026
Python, FastAPI, WebSockets, concurrent-user evaluation GitHub

- Evaluated quality under **50–100** concurrent users (latency **1–3s**); iterated reliability under release pressure.

Leadership & Achievements

- **Chairperson, Nexus SVNIT;** ACM SVNIT Executive Member; McKinsey.org Forward Fellow (2026)
- **LeetCode Knight 2048** (744 solved); **Codeforces Specialist 1419** (265 solved)
- **Google Solution Challenge 2026 — Global Top 106; Vibe2Ship 2026 — Global Top 20**

Technical Skills

AI for QE: **Cursor** (Agent/Composer), **Claude**, prompt engineering for test authoring, AI-driven automation of repetitive QA work
Languages (OOP): **Python**, **Java**, TypeScript/JavaScript, C++, **SQL**
Testing: Test-case design, **API testing**, unit/integration testing, **pytest** frameworks, regression suites, bug reporting, root-cause collaboration
Data & Tools: **MySQL/SQL**, **Git**, Linux/**shell**, Docker, CI/CD, REST APIs, Postman-style API validation
Learning next: Selenium WebDriver, Appium, REST-Assured-style frameworks
Soft skills: Excellent communication; self-starter; independent + collaborative in agile teams; passion for quality and fintech UX
