SDE Intern — **slice** | **Bengaluru (On-Site)**

B.Tech Artificial Intelligence, SVNIT Surat | CGPA **9.20/10** | Graduating **2028**

Daily **Cursor** + **Claude** user | Prompt engineering | AI-assisted shipping

Summary

Self-starter who builds with **Cursor** as a primary IDE and **Claude/Cursor Agent** workflows to ship software faster—multi-file edits, test scaffolding, debugging loops, and docs—after writing clear specs and reviewing every change. Strong coding fundamentals (LeetCode Knight **2048**, **744** solved). Excited by **fintech** products and by teams exploring how AI tools change how software gets built.

AI-Assisted Engineering Practice (Cursor / Claude)

- **Daily Cursor power-user:** Agent/Composer mode for multi-file refactors, inline edit for targeted fixes, and iterative prompt → generate → review → harden loops on real repos (not demos).
- **Prompt engineering for velocity:** Specs first (API contracts, edge cases, acceptance criteria), then AI for boilerplate, migrations, pytest scaffolding, and GitHub Actions—human-owned architecture, auth, and production data decisions.
- **Tool stack:** Cursor, Claude, Gemini API (product features), GitHub Copilot-style autocomplete when useful; comfortable exploring new AI coding tools quickly.
- **Automation mindset:** Uses AI to kill repetitive engineering work (scripts, CI digests, validation suites) so more time goes to design, correctness, and shipping.

Education

Bachelor of Technology in Artificial Intelligence

CGPA: 9.20/10

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India

Aug 2024 – May 2028

- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, Operating Systems, DBMS/SQL, Computer Networks, Design & Analysis of Algorithms

Experience

Software Engineering Intern

IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj, India

Jun 2025 – Jul 2025

- Shipped production tools automating **50+** **daily** workflows (**Node.js**, **Express**, **MySQL**)—independent ownership after minimal ramp-up; mentor check-ins for direction, not step-by-step hand-holding.
- Built **10+ RESTful APIs** with validation and structured error handling; debugged via logs/stack traces; communicated trade-offs to non-technical stakeholders.
- Owned quality through testing, documentation, peer review, **Docker**, and **CI/CD** in a deadline-driven environment.

Projects — Shipped Software & Hackathons

LogiFlow — End-to-End Platform (Google Solution Challenge 2026, Global Top 106)

Apr 2026 – Jun 2026

Python, FastAPI, TypeScript, Next.js, Redis, SQL, GCP Cloud Run, pytest, Cursor

GitHub | Live

- Technical Co-Lead: co-owned backend design and shipping—**Redis**-backed read paths, modular **Cloud Run** services, live product.
- Built **100/100** pytest business-rule suite; used **Cursor Agent** + **Claude** to draft tests/scaffolding after locking API contracts, then reviewed for leakage and edge cases before merge.

Community Hero — Solo-Shipped PWA (Vibe2Ship 2026, Global Top 20)

Jun 2026

TypeScript, React, Express, Firebase, Gemini API, GCP Cloud Run, Cursor

GitHub | Live

- Solo-owned framing through production deploy; applied **prompt engineering** for Gemini categorization with validation guardrails.
- Used Cursor for high-velocity UI/API boilerplate while keeping security rules, data model, and deploy path human-owned.

AirHelp — AI Airport Assistant (PowerMind Hackathon 2026)

2026

Python, FastAPI, React, WebSockets, RAG, prompt engineering

GitHub

- Shipped under hackathon pressure; iterated retrieval/prompts; evaluated quality under **50–100** concurrent users (latency **1–3s**).

Leadership & Achievements

- **Chairperson, Nexus SVNIT:** Departmental technical cell; workshops/contests for **500+** students
- **LeetCode Knight 2048 (744 solved)**; **Codeforces Specialist 1419 (265 solved)**
- **Google Solution Challenge 2026 — Global Top 106**; **Vibe2Ship 2026 — Global Top 20**; McKinsey.org Forward Fellow; ACM SVNIT Executive Member

Technical Skills

AI coding tools: **Cursor** (Agent, Composer, multi-file edit, rules/skills workflows), **Claude**, Gemini API, prompt engineering, AI-driven automation of repetitive engineering tasks

Languages: Python, TypeScript/JavaScript, Java, C++, SQL, C

Engineering: REST APIs, Node.js/Express, FastAPI, React/Next.js, MySQL, Redis, Firebase, Docker, CI/CD, Git, Linux, debugging, testing

Approach: Spec-first prompts; review every AI diff; self-starter in fast-paced teams; using AI to ship—not training ML models
