

VARUN GUPTA

Specialist (max.1581) at Codeforces ([Link](#)) | CFA Level 1 Candidate | ivarungupta7@gmail.com | +91 87558 94909 | [Github \(550+ contributions\)](#) | [Linkedin](#)

EDUCATIONAL QUALIFICATIONS			
Course/Examination	Institution	Year	Performance
Bachelor of Technology (B.Tech)	Birla Institute Of Technology Mesra	2022-2026	GPA: 7.95
CBSE [12 th Standard]	LBS Senior Secondary School Kota	2022	94.40%
ICSE [10 th Standard]	St. Joseph's College Prayagraj	2020	90.40%
TECHNICAL/FINANCE SKILLS : Python, SQL, PowerBI, VBA, OOPs, MS Excel, Financial Modelling, Machine Learning, Derivatives, Credit Risk Fundamentals and Metrics.			
PROFESSIONAL EXPERIENCE			
Wells Fargo Bank Winter Analyst		[Bengaluru, January 2026 – Present]	
Line of Business (LOB): Wealth & Investment Management Technology Division Sub-Line of Business: Investment Solutions & Banking, Lending & Trust			
o Developing Python pipelines to migrate Informatica workflows for the Portfolio Management Platform reducing the dependency on proprietary tools.			
o Developing MCP servers for the Alternative Investments Platform directly generating production-ready code from the Figma User Interface designs.			
Wells Fargo Bank Summer Analyst		[Hyderabad, June – August 2025]	
Received PPO (Pre Placement Offer) for exemplary performance Line of Business (LOB): Wealth & Investment Management Technology Division (WIMT)			
o Developed Config Drift Validator Tool for migration of data, focused on utilizing NFR Validator to completely eliminate manual checks for migration.			
o Config Drift Validator helped in saving developer's time about 3-4 hours per component (ISBLT had ~390 total components) equating 1100+ hours.			
o Engineered Firewall Validator Tool for migration of DB(MongoDB/Oracle) which helped in extracting several dependencies (Apigee, Kafka) into Excel.			
o Firewall Validator helped in saving developer's time about 2 hours per component (ISBLT had ~230 total components) equating 600+ hours.			
2Cents Capital Dubai Quantitative Developer Intern		[Remote, February – April 2025]	
2Cents Capital is a Quant based Hedge Fund firm headquartered in Dubai, specializing in Structured Products, Long Term equity and Quant Trading.			
o Built a multi-factor ML-driven quant framework with advanced screening and optimization, which outperformed the S&P 500 by 4% in live trading.			
o Designed a multi-factor quant model using 100+ factors and 10+ Machine Learning models to dynamically weight factors, & optimize equity portfolios.			
o Executed two stage fundamentals-based stock screening with advanced portfolio optimization (HRP, NCO, MVO), targeting \$1.5M in AUM for the firm.			
o Back tested on 20+ years of MSCI US Value Index data and deployed in live trading, which outperformed the S&P 500 by 4% during the test period.			
OMIFCO Oman Summer Intern		[Oman, May – June 2024]	
OMIFCO is a world-scale Manufacturing joint venture headquartered in Oman, specializing in production of Ammonia & Urea with revenue ~\$660 Million.			
o Enhanced the deployment of their Production QR Code receptor Tool for direct database entry retrieval which minimized the manual errors by 10%.			
o Engineered DB (Database) Links within consecutive systems which aimed to boost database fetch speed by 12-15% during peak-loads of entry retrieval.			
o Optimized the firm's Inventory Management System (IMS) using Oracle SQL Developer tool which in turn improved the query performance by 30%.			
PROJECTS			
Options Pricing Model Black Scholes & Monte Carlo Simulation	o Engineered Monte Carlo simulation engine in C++ for European options pricing using Geometric Brownian Motion, with configurable market parameters, incorporating risk-neutral pricing and stochastic modelling.		
	o Implemented statistical modelling framework with Gaussian random number generation and vectorized calculations for efficient derivatives valuation and risk assessment.		
	o Developed a C++ engine for European options pricing using the Black-Scholes model, calculating Greeks (Delta, Gamma, Theta, Vega, Rho) and implied volatility for comprehensive risk management.		
Intrinsic Value Analysis of Berkshire Hathaway (DCF Model)	o Engineered date-based features (e.g., months_since_last_payment, months_since_earliest_cr_line) by computing elapsed months from raw date strings, replacing 5 temporal columns with model-ready numeric inputs.		
	o Dropped all features exceeding the 50% missing values using a threshold-based filter (dropna with thresh), then median-imputed remaining nulls to prevent data leakage across train/test splits.		
	o Applied stratified 80/20 train-test split to preserve class imbalance ratio, then trained a Logistic Regression classifier achieving 92.56% test accuracy on LendingClub 2016-2017 loan data.		
	o Optimized classification threshold from default 0.5 to 0.066 using Youden's J-statistic on the ROC (Receiver Operating Characteristic) curve, improving bad loan detection sensitivity over the baseline model.		
AWARDS AND ACHIEVEMENTS			
Multinational Companies Competitions/Hackathons	Top 25 Fastest Coders Amazon HackOn S5 (52,000+ Participants INR 2,25,000 Prize Pool) Pre Placement Interview		
	Finalist in Walmart's Sparkplug SI 2025 which had 20,000+ participants overall India Summer Internship Opportunity		
	Selected for Amazon ML Summer School 2025 (3,000 qualify for the same out of 80,000+ candidates (~top 3%).		
	Selected for Goldman Sachs Virtual Insight Series (0.8% acceptance ratio across the globe).		
POSITIONS OF RESPONSIBILITY			
President Association for Computing Machinery BIT Mesra		[January 2024 – Present]	
A student-led competitive coding initiative with the goal to provide exposure to competitive coding and excelling in problem solving at coding competitions.			
o Coordinated the organization of Hack-A-Bit 2024, East India's Largest Hackathon, attracting over 300+ teams nationwide for a prize pool of INR 15,000.			
o Instructed C++ & DSA workshops for over 500+ undergraduate students, and organized LogicLounge, a series of live post Codeforces contest discussions.			
VIRTUAL INTERNSHIPS/COURSES/HOBBIES			
o Citi Bank Markets Quantitative Analysis (MQA) Virtual Internship Program on Forage Market Monitoring, Hedging securities, and Cash Equity.			
o Course Topper (100% score) in the course Conservation Economics curated by Prof. Ankur Awadhiya (IIT Kanpur) under NPTEL (conducted by IIT Madras).			
HOBBIES: Badminton, Table Tennis & Swimming.
