Summer 2027 Intern — Software Engineer AMTS (JR337715) | Class of 2028 | Futureforce

B.E/B.Tech (Circuit Branch / Computer Science-related): Artificial Intelligence, SVNIT Surat | CGPA 9.20/10

Preferred locations: India — Bangalore, Hyderabad | Office-Based | Full time internship

Professional Summary

Class of 2028 Futureforce candidate — penultimate-year B.Tech student in a Computer Science/Information Technology/Circuit Branch-eligible program (Artificial Intelligence) at SVNIT Surat, graduating May 2028. Self-starter with strong self-motivation, analytical and problem-solving skills; thrives in a fast-paced Scrum environment. Academic and professional/internship experience designing, developing, testing, and deploying software products and distributed systems / cloud services (Java, C++, Python; HTML, CSS, JavaScript, React). Strong Computer Science fundamentals: object-oriented design, data structures, algorithm development, problem-solving, complexity analysis, SQL and relational database concepts. Effectively communicates technical challenges and proposes solutions; skilled at navigating ambiguous / undefined problems and thinking abstractly. Eager to contribute optimized code, automated testing / testing infrastructure, and tools to monitor cloud services on a Salesforce Scrum team (Customer 360 / enterprise cloud) in Bangalore or Hyderabad.

Education

Bachelor of Technology (B.E/B.Tech) in Artificial Intelligence — Circuit Branch / CS-related

CGPA: 9.20/10

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat, India

Aug 2024 – May 2028

- Eligibility match:** Enrolled sophomore year or higher; working towards B.E/B.Tech in Computer Science / Information Technology / Circuit Branch pathway; graduating 2028
- Relevant Coursework:** Data Structures & Algorithms (algorithm development), Object-Oriented Design, Software Engineering, DBMS/SQL/relational databases, Operating Systems, Computer Networks, Distributed Systems, Machine Learning

Professional / Internship Experience

Software Engineering Intern

IFFCO (Indian Farmers Fertiliser Cooperative), Phulpur Unit, Prayagraj, India

Jun 2025 – Jul 2025

- Collaborated with the development team / mentors to design, develop, test, and deploy production software products (Node.js, Express, MySQL/SQL relational databases) automating 50+ daily workflows—software of exceptional quality in a fast-paced environment.
- Built 10+ RESTful APIs and optimized code; communicated technical challenges and proposed solutions; debugged ambiguous production issues with structured logging, root-cause analysis, and abstract problem decomposition.
- Contributed unit/integration automated tests and testing practices, peer code reviews, Docker, and CI/CD—owning reliability from development through deployment (self-starter ownership of service quality).

Projects (Academic / Professional Software Engineering)

LogiFlow — Multi-Modal Logistics Platform (Google Solution Challenge 2026, Global Top 106)

Apr 2026 – Jun 2026

Python, FastAPI, C++, TypeScript, React/Next.js, Redis, SQL, GCP Cloud Run, pytest

GitHub | Live

- Co-led backend on GCP Cloud Run integrating services into a distributed systems / cloud-scale pipeline at speed; delivered optimized code (hot paths 100–400 ms) with Redis caching for enterprise-style workloads.
- Built automated testing suite and testing infrastructure (100/100 business-rule validations) and documented APIs—practices aligned with high-quality cloud product releases and monitoring-ready services.

Community Hero — Civic Reporting PWA (Google for Developers Vibe2Ship 2026, Global Top 20)

Jun 2026

HTML, CSS, JavaScript, React, TypeScript, Express, Firebase, GCP Cloud Run

GitHub | Live

- Solo-shipped user-facing web app with HTML/CSS/JavaScript/React frameworks, REST APIs, and cloud deploy; quickly learned new technologies (Gemini, Maps) under ambiguous, undefined, fast-paced constraints.

AirHelp — AI Airport Companion (PowerMind Hackathon 2026)

2026

Python, FastAPI, React, WebSockets, ChromaDB, RAG

GitHub

- Developed real-time cloud services with latency monitoring targets (1–3s for 50–100 concurrent users); applied algorithm development (A*) with complexity analysis for reliable production-style behavior.

Technical Skills (Required + Desired)

Programming languages: Java, C++, Python; JavaScript, TypeScript, SQL, C

Web development technologies & frameworks: HTML, CSS, JavaScript; React (modern SPA frameworks; Angular/Vue patterns transferable); Next.js, Node.js, Express, FastAPI

Databases: Coursework and hands-on SQL and relational database concepts (MySQL, PostgreSQL)

Computer Science fundamentals: Object-oriented design, data structures, algorithm development, problem-solving, complexity analysis, distributed systems

Cloud, quality & ownership: Cloud services (GCP Cloud Run), automated testing / testing infrastructure (pytest), Docker, CI/CD, Git, production debugging, tools to support and monitor services, Scrum collaboration

Professional: Self-starter, self-motivation, analytical thinking, excellent technical communication, navigating ambiguous problems, abstract thinking, fast-paced delivery

Achievements and Leadership

- LeetCode Knight:** Rating 2048, 711+ solved, 32 contests — strong algorithm development & complexity analysis practice
- Codeforces Specialist:** Rating 1419, 252+ solved (profile)
- Google Solution Challenge 2026 — Global Top 106; Vibe2Ship 2026 — Global Top 20**
- McKinsey.org Forward Fellow (2026); ACM SVNIT Executive Member & Nexus DSA Mentor** — clear technical communication and mentorship
