

Edison Intern — Final Reviews Prep

Program Manager + HR · what candidates were actually asked · Kavya Bhatiya

Tech cleared

Next: PM + HR

No-show = withdrawal

Read this first. Built from public GFG / campus / AmbitionBox write-ups for GE HealthCare Edison / EEDP / intern paths. Not a leak of your panel. One hard fact: a SVNIT candidate **cleared technical and failed HR** — treat both Saturday rounds as real filters.

Your path this week

Program Manager

Ownership · why healthcare · why Edison · can you ship and take feedback

HR

Products · competitors · relocate · strength with proof · offers

A. Program Manager — prepare these

Sources: GFG EEDP Manager / managerial rounds · Freshers Dunia (Tech → Manager → HR) · Extern behavioral

1

MOST COMMON

What did you build? What's the USP?

SAY

LogiFlow ranks road/rail/air/sea on time, reliability, cost, sustainability with delay-risk (73% / 68% recall / 78.3% ROC-AUC). USP: honest decision support, not “fastest only.” Top 106 GSC 2026. I owned FastAPI pipelines + delay-risk; team product overall.

2

STRESS TEST

Why healthcare when Amazon / product companies pay more?

SAY

I want my first industry bar to be reliability, not only features. Edison Intern → path toward EEDP is the growth track I want if I earn it. Impact + craft.

3

COMPANY FIT

Why GE HealthCare / what do you know about us?

SAY

GE HealthCare (standalone) — imaging (MRI, CT, ultrasound, X-ray), patient monitoring; Edison = AI/analytics layer. I want software clinicians can trust.

OFTEN ASKED

Higher studies? Learning / challenge? What is EEDP/Edison?**SAY**

Near term: industry depth via internship (then EEDP if strong). Higher studies later only if needed.
Challenge: accuracy looked fine, recall was the real metric — I corrected course. Edison/EEDP: rotations, mentorship, healthcare product exposure — ship under review.

Manager tip from reviews: keep 4–5 key points ready — spontaneous waffle loses offers. Research the website. Explain LogiFlow like they never coded.

B. HR — prepare these

Sources: GFG SVNIT Aug 2024 (tech clear → HR reject) · PCON EID · FTE EEDP HR · Intern 2021 · Senior SVNIT

They ask	Your line
Competitors?	Siemens Healthineers, Philips — high level. Chose GEHC for Edison path, not fake market analysis.
Relocate to Bengaluru?	Yes. Full internship on-site. No constraints. Family supports it.
GEHC products?	MRI, CT, ultrasound, X-ray, patient monitoring; Edison AI/analytics. Not claiming clinical depth.
Why GEHC / healthcare?	Reliability bar matches how I work (honest metrics on LogiFlow). Want Edison → EEDP if I perform.
Strength + example?	Ownership with honesty — defended recall/ROC-AUC when accuracy looked prettier.
Weakness + fix?	Over-polished before feedback → now time-box and show a thin slice earlier.
Teamwork proof?	LogiFlow team interfaces + reviews; Web Wonders / Echelon finals under deadlines.
Other offers?	Truth only. If none: GEHC Edison is my priority. Never invent offers.
Hobbies / clubs?	DSA practice, campus competitions — 20 seconds, then stop.

HR kill-shots (from reviews): vague products · “maybe” on relocate · strength with no example · memorised internet HR script · badmouthing · no-show / late join.

C. 10-minute drill (do this aloud)

1. 45s intro (name · CGPA 9.05 · LogiFlow Top 106 · tech cleared · Edison)
2. 60s LogiFlow USP for a non-engineer
3. 40s why healthcare ≠ money chase
4. 30s products + competitors + relocate yes
5. 45s strength + weakness
6. One question: “What does a strong Edison intern look like by week 2?”

Numbers — don't drift

- CGPA 9.05
- 73.0 / 68.0 / 78.3
- Top 106 GSC 2026
- LeetCode 470+ · 1620

Day-of

- Join 5–7 min early
- Same story as tech round
- Camera on · quiet room
- Thank · one Q · stop

One page to remember: USP · why healthcare · products/competitors/relocate · strength with proof · Bengaluru yes. Everything else is backup.
