

HR Round — Prep

Kavya Bhatiya · post-tech · Edison Intern · GE HealthCare

Why GEHC

Strength / weakness

Consistency

No-show = out

HR clears people who cleared tech. Treat this as seriously as the Program Manager round. Tone: warm, clear, consistent with your tech story. No jokes about skipping rounds. No-show = withdrawal.

HR checks: motivation, stability (Bengaluru + dates), communication, values fit, honesty on offers, and whether you sound coachable. Keep answers 45–75 seconds unless they ask for a story.

1. Must-know facts (do not invent more)

Topic	Say this
Company	GE HealthCare (standalone since 2023 spin-off) — not “GE” alone
Products	Imaging (MRI, CT, ultrasound, X-ray), patient monitoring; Edison = AI/analytics layer
Competitors	Siemens Healthineers, Philips — high level only
Role	Edison / EID Software Intern · path of interest toward EEDP
Location	Bengaluru — yes, ready on-site
You	CGPA 9.05 · LogiFlow Top 106 · LC 470+ (1620) · Web Wonders + Echelon finalist · Vadodara / SVNIT Surat

2. Spoken answers

Q. Tell me about yourself.

YOU SAY

I am Kavya Bhatiya from Vadodara, B.Tech AI at SVNIT Surat, CGPA 9.05. I build systems that combine models and software — LogiFlow reached Top 106 in Google Solution Challenge 2026. I also research multi-objective recommendation with NSGA-II, and I practice DSA seriously — 470-plus LeetCode. I cleared the technical interview and I am excited for the Edison intern role.

Q. Why GE HealthCare?

YOU SAY

Healthcare software sits next to real clinical decisions. I want an internship where reliability and testing are not optional. GE HealthCare’s imaging and monitoring products, plus Edison for AI, match how I already work — models inside systems people can trust. The Edison intern path toward EEDP is the growth track I want if I perform.

Q. Strength?

YOU SAY

Ownership with honesty. On LogiFlow I did not hide behind a flattering accuracy number — I reported recall and ROC-AUC because delays are the minority class. Managers can trust that I will surface risk early instead of only demo polish.

Q. Weakness?

YOU SAY

I used to over-polish before asking for feedback. In Solution Challenge I started time-boxing UI and showing a thin working slice earlier so teammates could unblock. I still care about quality; I now ask for review sooner.

Q. Tell me about a challenge / failure.

YOU SAY

Delay model looked “good” on accuracy and was weak on finding real delays. Challenge: admit the metric was wrong under imbalance. Fix: elevate delayed-class recall and ROC-AUC; keep the model as advisory risk inside ranking. Lesson: pick the metric the user feels.

Q. Teamwork / leadership?

YOU SAY

LogiFlow was a team product — I owned backend pipelines and delay-risk; others owned modes and UI. We used clear interfaces and reviews. Outside that: Web Wonders and Echelon finalist work taught deadline delivery with teammates. I communicate blockers early.

Q. Hobbies / besides coding?

YOU SAY

Keep it real and short: DSA practice as sport, reading about healthcare tech, campus competitions. Do not invent elaborate hobbies you cannot discuss for two minutes.

Q. Other offers / why us if you have options?

YOU SAY

Be honest about status without games. If GEHC is priority: “GE HealthCare is my first choice for healthcare impact and the Edison/EEDP path; I will decide respectfully and on time with any other processes.” Never invent competing offers.

Q. Family / will you join if selected?

YOU SAY

Yes. Parents support an on-site Bengaluru internship. I will complete joining formalities on time.

Q. Where do you see yourself in 5 years?

YOU SAY

A software engineer who can own a feature in a regulated/healthcare setting — design, tests, and clear communication with clinical/product partners. EEDP-style growth at GE HealthCare is the path I am aiming for if I earn it through internship performance.

3. Questions for HR (pick 1)

- “What does onboarding look like for Edison interns in the first week?”
- “How do interns typically receive mentorship and feedback during the 8 weeks?”

Avoid: salary negotiation theatre, PPO guarantees, “can I work from home?”

4. Day-of checklist (Saturday)

- Join 5–7 min early; camera on; quiet room
- Resume PDF open; same story as tech round
- Collared shirt; eye-level camera
- Phone silent; backup hotspot ready

- Intro + why GEHC rehearsed once aloud
- Strength / weakness / STAR ready
- Bengaluru = unqualified yes
- Thank them; one question; stop

Consistency rule. Numbers and ownership must match what you told the technical panel (73.0 / 68.0 / 78.3 · Top 106 · CGPA 9.05 · LeetCode 470+). HR often has notes.
