

Mock 12 — Curveballs + clean close

Odd one-offs from scrapes · stay humble · 15–20 min

20 min

Curveballs

Day-before

INTERVIEWER If I call one of your professors or a project mentor — what would they say about you?

Adapted from GFG “ex-employer feedback” HR probe

YOU SAY

That I deliver what I promise, ask precise questions, and don’t hide bad news. They’d also say I can over-invest in polish — I’ve been fixing that with time-boxes.

INTERVIEWER What changes should GE HealthCare incorporate?

GFG PPO HR one-off — dangerous if arrogant

YOU SAY

As an outsider I won’t prescribe. I’d ask what slows new-intern onboarding and help there. Curiosity beats criticism.

INTERVIEWER Where do you see yourself in 5 years?

YOU SAY

A strong backend/applied-ML engineer who owns reliability-critical components in healthcare software. Prefer compounding here if I earn it — not hopping for titles.

INTERVIEWER Will you pursue a master’s next year?

YOU SAY

Near term: industry. This internship isn’t a placeholder. Master’s later only if a specific problem needs research depth.

INTERVIEWER Online/hybrid classes — how did you stay disciplined?

GFG Intern 2021 HR asked about online education

YOU SAY

Fixed schedule, camera-on when required, weekly goals for DSA + projects. Treat remote like on-site — same for a Bengaluru internship day.

INTERVIEWER Sell me on hiring you in 45 seconds.

YOU SAY

I ship and measure. LogiFlow Top 106 with honest metrics I can defend. I’ve prepared GEHC basics so I’m ready for PM and HR. Bengaluru full yes. I’ll take feedback and make the team’s life easier, not harder.

INTERVIEWER Questions?

YOU SAY

What does a strong EID intern look like in week 2 vs week 6?

After Mock 12: stop inventing new stories. Sleep. Morning-of = Set 1 Mock 6 cold run only.
