

Mock 7 — Resume roast + situational barrage

GFG GE Intern 2022 managerial · ~40 min pattern compressed to 25 · EID Intern

25 min

Resume roast

Situational

Source: Managerial round described as “basically resume roasting” + many situational Qs + Why GE?

Time	Block
0–2	Intro (≤90s)
2–10	Line-by-line resume: LogiFlow → SMSRF → LC → competitions
10–18	Situational rapid fire
18–22	Why GEHC (use real reasons, not vague brand)
22–25	Bengaluru + your Q

INTERVIEWER Introduce yourself — under 90 seconds.

YOU SAY

Kavya Bhatiya, B.Tech AI, SVNIT Surat, CGPA 9.05. Cleared tech. I build measurable systems — LogiFlow Top 106 GSC 2026; multi-objective research with NSGA-II; 470+ LeetCode. Here for EID Intern in Bengaluru.

INTERVIEWER CGPA 9.05 — what does that say about how you work under load?

YOU SAY

Consistency over spikes. I plan weekly: academics + project slices + DSA. When GSC collided with semesters I cut project scope instead of letting grades or the core demo slip.

INTERVIEWER SMSRF / NSGA-II on the resume — one minute, no jargon dump.

YOU SAY

Multi-objective recommender research — optimising conflicting goals (e.g. novelty vs serenity) with NSGA-II. Reported gains vs a baseline on MovieLens. Habit: when goals conflict, measure trade-offs explicitly — same habit as LogiFlow’s four objectives.

INTERVIEWER Teammate misses a deadline two days before a demo. What do you do?

YOU SAY

Check blockers without blame → re-scope their slice to a minimum → take a parallel critical path if I can → tell the team early what’s at risk. Never surprise the demo with silence.

INTERVIEWER Senior asks for a feature that would break your metric honesty. Response?

YOU SAY

Explain the failure mode in one sentence + offer a safer alternative (flag as experimental / behind a toggle). I won’t ship a number I can’t defend — especially near clinical-adjacent software.

INTERVIEWER Why GE HealthCare — and don’t say “brand.”

YOU SAY

Imaging + monitoring + Edison AI layer = software that must earn trust. I want that reliability bar as my first internship. Bengaluru engineering + EID mentorship is the learning environment I chose — not any logo.

INTERVIEWER Relocate? Question?

YOU SAY

Yes, full Bengaluru. Q: In managerial check-ins, what signal tells you an intern is on track by week 3?
