Surekha Sailesh — Findings

Public-web only · Edison Program Manager (confirmed by GEHC TA posts) · Kavya Edison Intern PM round

Spelling: Sailesh (not Shailesh)

Bengaluru

Sr. Manager — Strategic Programs

Highest-likelihood PM panelist

Why she matters for you. Multiple GE HealthCare India / TA posts for the 2025 Edison intern cohort explicitly thank *Edison Program Manager Surekha Sailesh* alongside APAC TA Head Annu Mathew and HR partners. A GE HealthCare India “Desk Diaries” post notes photos of her *Edison batches* on her desk — early-talent is core to her work. For a post-tech “Program Manager” round on Edison Intern, she is the highest-probability named interviewer from public sources.

Inference vs fact. Role + Edison Program Manager title = CONFIRMED. Exact Saturday panel assignment is NOT public. Everything about “how she interviews” is INFERENCE from role + campus EID Intern managerial patterns. Do not say “I saw your LinkedIn.”

EID Intern ≠ PPO. GFG “project you are on / USP for the organisation” and “learning in the internship to date” are for people *already interning* converting to FTE. Kavya is a **campus EID Intern** candidate — ask about *her* projects (LogiFlow), why GEHC/EID, ownership, Bengaluru — not GE project USP.

CONFIRMED

Edison Program Manager (TA posts)

Apr 2023→

Sr. Manager, Strategic Programs & Initiatives

EID Intern

campus fit · not PPO

1. Confirmed public facts

Item	Detail
Current title	Sr. Manager — Strategic Programs & Initiatives, GE HealthCare (India)
Edison role	Named Edison Program Manager on GEHC intern onboarding posts (May 2025 cohort of 35; SVNIT Surat listed among colleges)
Prior GEHC	India Healthcare Technology Center — Strategic Programs and Initiatives Lead (Nov 2021 → Apr 2023), Bengaluru
Before GEHC	Cisco — Program Manager, Enterprise PMO & Operations; Business Operations / site strategies
Public themes	University relations, early talent, partner/program ops, employee engagement, cross-functional interlock
Culture signal	Desk Diaries: Edison batch photos + art/painting — values young talent energy, not only delivery metrics
Public AI pride	Reposted GEHC topping USFDA AI-enabled medical device authorizations list — cares about healthcare AI impact narrative

2. What she is likely screening for — EID Intern (INFERENCE)

- **Why EID / why healthcare / why GEHC** — genuine, not “any internship.”
- **Ownership on *your* projects** — LogiFlow: what you built, what was hard, honest metrics — not “USP for GE.”
- **Will you show up** — Bengaluru full duration; no-show = withdrawal.
- **Coachability** — feedback, ambiguity, conflict without ego.
- **Curiosity** — what a strong EID intern looks like; how interns are staffed.

She is a **program / strategic ops** leader, not an architect. Expect fit + ownership storytelling, not live coding. Skip PPO phrasing.

3. How to play 20–25 minutes with her

Do	Don't
45s intro → LogiFlow you owned → why healthcare / EID → why GEHC → Bengaluru yes → 1–2 intern questions	PPO “project I’m on at GE” answers · name-drop LinkedIn · invent SKUs · “maybe” on relocate · accuracy-only metrics

One line she should hear.

“I want my first engineering bar to be reliability under clinical-adjacent standards — LogiFlow taught me to defend metrics honestly; EID is where I want to grow that under mentorship.”

Public LinkedIn / GFG / company posts only · Kavya Bhatiya prep · not affiliated with GE HealthCare · do not name-drop LinkedIn in the interview

GEHC Bengaluru — Program Manager Roster

Public LinkedIn / company posts · who could sit a “Program Manager” / managerial round · ranked by Edison-intern relevance

14 people mapped

Edison-linked first

Then AI/Edison platform PMs

Then product / TPM

Panel assignment is never public. Treat Tier A as primary prep; Tier B/C as “if the calendar name is different, adapt tone.” Do not contact these people. Do not mention scraping this list in interview.

Tier A — Edison / early-talent program (prep first)

Person	Public role	Why relevant
HOT Surekha Sailesh	Sr. Manager, Strategic Programs & Initiatives; named Edison Program Manager	Thanked on 2025 Edison intern onboarding (35 interns; SVNIT listed). Desk has Edison batch photos. Highest-likelihood PM round.
ED Uma Parameswaran	Lean Six Sigma MBB · Edison Program Manager · Talent Competency Leader (since ~2013)	Long-standing Edison Program Manager; issues Edison impact awards / graduation support. Alternate or senior Edison voice.
Annu Mathew	TA Leader — APAC / Global IT Segment	Leads campus / Edison talent posts; more TA/HR than PM, but co-appears with Surekha on Edison intern wins.
HR partners (cohort posts)	Monika Suryawanshi · Amrita Mishra · Shreya Kumar · Sarvesh Sharma · Siren Sivan	Delivery / HR side of Edison intern process — more likely HR round than PM, but know the names if calendar shows them.

Tier B — Edison platform / AI program delivery (if named)

Person	Public role	Tone shift if they interview
AI Gajanana Kamath	Sr. Program Manager — AVS Digital; ex Staff TPM — Edison AI	Regulated software / SaMD / AI-ML delivery language. Lean into metric honesty, risk, reliability — not only soft fit.
AI Hitesh Boda	Sr. PM AI/ML (STO); ex Sr. PM Edison Data Platform	Data platform, governance, clinical data lake. Speak pipelines, validation, “advisory not verdict” for ML.
AI Shubha Shirsat	Product Program Leader — AI/ML Strategic Partnerships	Partnerships / AI programs. Why healthcare AI + honest impact story.
AI Ashwin TV	AI Transformation Program Manager (PCS)	Portfolio / governance of AI initiatives. Prioritisation and measurable outcomes.

Tier C — Product / TPM / ops PMs (Bengaluru)

Person	Public role	Note
Rajee Kukreja	Sr. PM — Advanced Visualization Solutions Digital; ex PCS Data Platform TPM	Imaging / AVS digital + data-as-product.
Abhilash G	Program Manager (Agile/SAFe, embedded SW background)	Classic delivery PM — ownership, milestones, conflict.
Sheeja Shetty	Program Manager; ex NASSCOM Digital Innovation / Novo Nordisk	Innovation ecosystem background.
Preethi Kandavel	Sr. Staff Technical Program Manager	Agile coaching + TPM depth.
Keshava J	Staff Technical Program Manager	Scrum / PI planning / stakeholder reporting.
Rajesh Roshan	TPM / Staff Software Architect; PACS performance & reliability	Reliability programs — metric honesty lands well.
Sandeep MB	Senior Staff TPM; LPI Digital Cloud (AWS)	Cloud migration / cross-functional governance.

Sravan Vasireddy	Strategic Initiatives Leader — Enterprise Applications	Enterprise release / transformation — less Edison-intern specific.
-------------------------	--	--

Practical rule (EID Intern). Calendar “Program Manager” → Mock 1 (Surekha-style fit). Tier B/C name → Mock 2. Never use PPO “project you’re on / USP for the organisation.”

Public LinkedIn / GFG / company posts only · Kavya Bhatiya prep · not affiliated with GE HealthCare · do not name-drop LinkedIn in the interview

GFG Managerial Scrape — Filtered for EID Intern

Kavya is campus EID Intern (pre-start) · PPO / “already at GE” questions marked SKIP

EID Intern only

SKIP = PPO junk

USE = campus / fit

Skip these for EID Intern. From GFG Internship+PPO “EEDP Manager” round — written for someone *already interning*: “What project are you on and what USP does it create for the organisation?” · “Learning experience in the internship to date?” Do not rehearse those phrasings. Translate to: tell me about *your* strongest project / what you owned.

1. USE for EID Intern PM round

Ask this way	Why	Source cue
Introduce yourself — why EID Intern?	Opener	Every campus write-up
Walk me through your strongest project — what did <i>you</i> own?	Ownership (not GE USP)	FTE managerial · Off-campus 2021 · campus
What was hard / what did you learn?	Coachability	GE 2019 · Extern
Why GE HealthCare / why healthcare?	Motivation	FTE · EEDP campus · PPO overlap OK
What do you know about us? (website)	Research	GFG FTE managerial
Why are you a good fit — tech + projects?	Fit map	FTE · EEDP campus
Disagreement / ambiguity / feedback?	Intern delivery	AmbitionBox · campus prep
Hobbies? Strength / weakness with proof?	Human	FTE · GE 2019
Bengaluru full duration?	Logistics	SVNIT 2024 · GE 2019
Questions for me?	Curiosity	Every write-up

2. SKIP for EID Intern (PPO / already-employed)

Irrelevant question	Why skip
“What project are you on and USP for the organisation?”	Assumes you are already on a GE project
“Learning experience in the internship to date?”	Assumes internship already started
Deep “rate the EEDP program structure” as primary	EID Intern first; EEDP is a later path if earned — one calm line is enough
Managerial puzzles as core prep	Rare one-off; don’t centre mocks on them

GFG tip still useful: prepare key points; honesty beats spontaneous fluff. Just use EID Intern wording.

Public LinkedIn / GFG / company posts only · Kavya Bhatiya prep · not affiliated with GE HealthCare · do not name-drop LinkedIn in the interview

Program Manager Round — EID Intern filter

Campus EID Intern · post-tech · PPO questions removed

EID Intern Surekha Saitesh No PPO USP Q

Irrelevant for EID Intern: “What project are you on, and what USP does it create for an organisation?” and “learning in the internship to date” — those are GFG PPO / already-at-GE manager questions.

Use instead: strongest project you owned · why EID / GEHC / healthcare · conflict or learning STAR · Bengaluru full yes · what a strong EID intern looks like. Pack: Kavya_GEHC_PM_Master_Pack.pdf

Ask	Skip
Walk me through a project you owned	Project you’re on + USP for the org
Why healthcare / why GEHC / why EID	Rate EEDP as if converting PPO
Ambiguity · conflict · feedback	Internship learning to date

8:00–13:00	Why GEHC / healthcare	Motivation; no Amazon-bash.
13:00–17:00	Learning / ambiguity	Metric honesty or thin-slice STAR.
17:00–20:00	After internship	Ship + learn; EEDP only if earned — light.
20:00–25:00	Bengaluru + questions	Full yes; intern success criteria.

Script

INTERVIEWER Good morning. Please introduce yourself — and why the EID / Edison Intern role.

YOU SAY

Good morning. I am Kavya Bhatiya, B.Tech Artificial Intelligence at SVNIT Surat, CGPA 9.05. I cleared technical. Strongest work: LogiFlow — multimodal logistics on FastAPI, PostgreSQL, Next.js with delay-risk ML — Top 106 Google Solution Challenge 2026. I am here for EID Intern because I want to contribute on a live healthcare software team, take feedback from seniors, and learn GEHC engineering practices on-site in Bengaluru.

INTERVIEWER Tell me about your strongest project — what did you personally own, and what was hard?

EID Intern framing · NOT “USP for the organisation” / PPO

YOU SAY (~75s)

LogiFlow ranks road/rail/air/sea on time, reliability, cost, and sustainability. Most tools optimise only speed or cost; we put delay risk in the ranking. I owned the FastAPI ranking pipelines and the HistGradientBoosting delay-risk model — 73.0% accuracy, 68.0% delayed recall, 78.3% ROC-AUC — tuned for recall because missing a delay costs more than a false alarm. Hard part: early accuracy looked fine while we were missing real delays. I moved the team to recall and ROC-AUC and treated the model as an advisory risk signal, not a verdict. Outcome: Top 106 global. That habit — measure what the user feels — is what I want to bring as an EID intern.

INTERVIEWER Why healthcare — and why GE HealthCare — for this internship?

YOU SAY (~60s)

I want my first real engineering bar to be reliability under clinical-adjacent standards. In LogiFlow a wrong risk signal costs money; here it can cost trust. GE HealthCare builds imaging and monitoring plus a software/AI layer (Edison) clinicians rely on. EID gives live project work under review — how I learn fastest. Money matters, but early on the problem shape matters more; I’m not Amazon-bashing, I’m choosing this bar.

INTERVIEWER Tell me about a time something was unfamiliar or you had to change approach under pressure.

YOU SAY – STAR

Delay model looked fine on accuracy, weak on real delays. Unfamiliar: defending a “bad looking” metric choice. Switched focus to recall/ROC-AUC; kept the model advisory inside ranking. Learned to pick the metric the user feels — same loop I’ll use on a new codebase here.

INTERVIEWER Where do you see yourself after this internship?

YOU SAY (~40s)

Short term: contribute a tested slice on a real backlog and learn GEHC practices. If performance is strong, I’m interested in growing further here — including an EEDP-style path later if I earn it. I’m not claiming a title; I want to compound in healthcare software.

INTERVIEWER Bengaluru, full duration — any constraints?

YOU SAY

Yes — full duration, on-site Bengaluru, no constraints. Every scheduled slot is mandatory; no-shows are not an option for me.

INTERVIEWER Questions for me?

YOU SAY (pick 1–2)

What does a strong EID intern look like in week 2 versus week 6?
How are interns staffed — one-team ownership or rotating support?
Avoid: stipend, PPO odds, WFH, “how did I do?”, LinkedIn name-drops.

Rapid probes

- Explain LogiFlow to a non-coder → risk score for routes, not a black-box “fastest.”
- Strength with proof → ownership + metric honesty.
- Weakness → early over-scoping; now ship thin slices.
- Higher studies? (if asked) → industry first this internship; master’s later only if a problem needs research depth.

Score 1–5: Structure · Project ownership · Why EID/GEHC · Learning STAR · Bengaluru · Questions.

Fail: answering as if already on a GE project · inventing SKUs · “maybe” relocate · no questions.

PM Mock 2 — EID Intern · Campus / Sr Manager filter

Alternate PM name or classic campus managerial · still EID Intern · no PPO USP phrasing

20–25 min

Website + fit

Ownership drill

Conflict + hobbies

vs Mock 1. Same EID Intern audience. Mock 1 leans Surekha / program fit. Mock 2 leans website research, cross-questions on LogiFlow, conflict, hobbies.

Clock

Time	Block	Goal
0:00–2:00	Intro	Why EID Intern.
2:00–7:00	GEHC website / why GE	Accurate; no invented SKUs.
7:00–13:00	Your project drill	What you built; X-factor; metrics.
13:00–18:00	Conflict / ambiguity	STAR maturity.
18:00–21:00	Hobbies + strength/weakness	Short + proof.
21:00–25:00	Bengaluru + close	Yes + intern questions.

Script

INTERVIEWER Introduce yourself.

YOU SAY

Kavya Bhatiya, B.Tech AI, SVNIT Surat, CGPA 9.05. Backend + applied ML. LogiFlow (FastAPI/Postgres/Next.js/delay-risk) — Top 106 GSC 2026. 470+ LeetCode. Here for EID Intern to ship on a live healthcare team in Bengaluru.

INTERVIEWER What do you know about GE HealthCare?

GFG FTE managerial — website · USE for EID

YOU SAY

Standalone med-tech: imaging (MRI/CT/X-ray/ultrasound), patient monitoring, plus software/digital turning device data into clinical insight. Edison = AI/analytics layer. Customers: hospitals, imaging centres, clinicians. I want to build reliable software in that stack — not invent model numbers.

INTERVIEWER Why are you a good fit for EID Intern — technologies and projects?

YOU SAY

I ship systems: FastAPI, Postgres, Docker, Next.js, HistGB/CatBoost. LogiFlow end-to-end ownership with defensible metrics 73/68/78.3. Fit is ownership + measuring what I ship + taking feedback. Domain I'll learn fast on the team.

INTERVIEWER Walk me through what you personally built on LogiFlow. What was the X-factor?

YOU SAY

Mine: ranking pipelines, delay-risk model, Docker packaging with the team. X-factor: multi-objective ranking with delay risk first-class — plus honest metrics. Hard: accuracy hid missed delays; I moved us to recall/ROC-AUC.

INTERVIEWER Disagreement on the team?

YOU SAY — STAR

UI polish vs harden metrics under GSC deadline. Argued defensible metrics > polish; time-boxed UI; locked three metrics. Compromise on polish, not on numbers I cannot explain.

INTERVIEWER Ambiguous requirements?

YOU SAY

Smallest acceptance check → confirm in one message → thin slice → show early. LogiFlow: rank schema before more modes.

INTERVIEWER Hobbies? Strength and weakness with examples?

YOU SAY

Hobbies: DSA, Web Wonders/Echelon, healthcare-tech reading — short.

Strength: ownership + metric honesty.

Weakness: early over-scoping; now cut to shippable core.

INTERVIEWER Bengaluru full duration? Questions?

YOU SAY

Yes — full, on-site, no constraints.

Q: What does success look like for an EID intern by week 6? Optional: communication cadence you expect?

EID Intern — what we dropped

Dropped (PPO)	Use instead (EID)
Project you're on + USP for the organisation	Strongest project you owned + what was hard
Learning in the internship to date	Learning from LogiFlow / GSC / unfamiliar situation
Deep EEDP program quiz as centrepiece	Why EID Intern now; EEDP only as optional later path

Day-of. Surekha / Edison PM → Mock 1. Other name → Mock 2. Same EID Intern answers either way.

Public LinkedIn / GFG / company posts only · Kavya Bhatiya prep · not affiliated with GE HealthCare · do not name-drop LinkedIn in the interview

PM Mock 3 — EID Intern · STAR pressure tape

Back-to-back behavioural · conflict · failure · feedback · prioritisation · 20 min

20 min

STAR only

Interruptions OK

EID Intern

Friend fires pink lines fast. Keep each answer 45–60s. If they interrupt with “so what?” land the Result in one sentence.

Clock

Time	Probe
0:00–2:00	30s intro + why EID
2:00–5:00	Conflict STAR
5:00–8:00	Something you owned that broke / failed
8:00–11:00	Critical feedback
11:00–14:00	Deadline — what did you cut?
14:00–17:00	Ambiguous task from a senior
17:00–20:00	Bengaluru yes + one question

INTERVIEWER 30 seconds — who are you and why EID Intern?

YOU SAY

Kavya Bhatiya, B.Tech AI, SVNIT, CGPA 9.05. LogiFlow — Top 106 GSC 2026. I want EID to ship on a live healthcare software team in Bengaluru under review.

INTERVIEWER Disagreement with a teammate. STAR. Go.

YOU SAY

S: GSC deadline; teammate wanted UI polish, I wanted harden delay-risk metrics.

T: Keep a demo we could defend.

A: Time-boxed polish; locked 73/68/78.3; Gemini off critical path; made it a data conversation.

R: Cleaner demos. I compromise on polish, not on numbers I cannot explain.

INTERVIEWER Something you owned broke. What did you do?

YOU SAY

S: FastAPI ranking endpoint returned inconsistent results under load near a demo — my slice.

T: Fix without hiding it.

A: Flagged the team immediately; reproduced; fixed non-deterministic handling; added a check for that class of bug.

R: Demo held. Owing breaks out loud beats a quiet patch.

INTERVIEWER Hard feedback that stung?

YOU SAY

Mentor said leading with accuracy on an imbalanced delay problem was misleading. It stung; he was right. I switched to recall + ROC-AUC together and closed the loop. Default: assume they've seen something I haven't.

INTERVIEWER Under a hard deadline — what did you cut and why?

YOU SAY

Cut scope on extra modes / polish; kept ranking schema + delay-risk metrics. Saying no to good ideas so the core ships is how we hit Top 106.

INTERVIEWER Senior gives a vague ticket. First three moves?

YOU SAY

- 1) Write smallest acceptance check — input, output, failure case.
- 2) Confirm in one message.
- 3) Ship a thin slice, show early, iterate. Same as fixing LogiFlow rank schema before more modes.

INTERVIEWER Bengaluru full duration? One question for me.

YOU SAY

Yes — full, on-site, no constraints. Question: what does a strong EID intern look like by week 6?

Fail flags: long stories with no Result · blaming teammates · “maybe” on Bengaluru · PPO USP phrasing.

PM Mock 4 — EID Intern · Explain + company research

Program manager who is not deep-coding · communication + why GEHC · 20 min

20 min

Layman English

Website check

EID Intern

If you drown them in FastAPI jargon, you fail this mock even if tech was right.

Clock

Time	Block
0:00–2:00	Intro
2:00–7:00	Explain LogiFlow to a non-engineer
7:00–11:00	What do you know about GEHC?
11:00–15:00	Why healthcare / why EID for you
15:00–18:00	How will you ramp in week 1–2?
18:00–20:00	Bengaluru + questions

INTERVIEWER Introduce yourself — keep it human.

YOU SAY

I'm Kavya, AI undergrad at SVNIT Surat. I like building systems that make trade-offs visible — my team's LogiFlow project reached Top 106 in Google Solution Challenge. I'm interviewing for EID Intern to do that kind of careful engineering on healthcare software in Bengaluru.

INTERVIEWER Explain your project as if I'm a hospital ops person, not a coder.

YOU SAY

Imagine choosing how to move a shipment — cheap, fast, and reliable pull in different directions. LogiFlow shows options side by side and flags which ones are more likely to arrive late — like a weather risk score for logistics. It doesn't make the final call; it gives a clearer picture so people don't pick "cheap and fast" that often fails. I built the scoring backend and the delay-risk model, and I insisted we report the metrics that matter — catching real delays — not only a flattering accuracy number.

INTERVIEWER What do you actually know about GE HealthCare?

YOU SAY

Major med-tech company, now standalone. Imaging — MRI, CT, X-ray, ultrasound — plus patient monitoring, and a growing software/AI layer that turns device data into clinical insight. Edison sits in that software layer. Customers are hospitals and clinicians. I'm not inventing product model numbers; I care about the reliability bar those products need.

INTERVIEWER Why this internship — why not a pure product company?

YOU SAY

Money matters, but early career the multiplier is the problem. I want reliability under clinical-adjacent standards. LogiFlow taught me wrong signals have a cost; healthcare raises that cost. EID is live work under seniors — how I learn.

INTERVIEWER First two weeks here — how do you ramp without wasting the team?

YOU SAY

Read the smallest ticket end-to-end; write acceptance checks; ask one clarifying question early; ship a thin visible slice; update in writing. I'd rather show a small correct piece than disappear for a week.

INTERVIEWER Relocate? Questions?

YOU SAY

Yes — full duration Bengaluru. Q: How do you expect interns to communicate progress — standup, chat, or short written updates?

Public LinkedIn / GFG / company posts only · Kavya Bhatiya prep · not affiliated with GE HealthCare · do not name-drop LinkedIn in the interview

PM Mock 5 — EID Intern · Interrupt & probe

Manager cuts you off · “prove it” · ownership language · 20 min

20 min

Pressure

I not we

EID Intern

Friend should interrupt mid-answer with the pink follow-ups. Train landing a crisp close.

INTERVIEWER Tell me about LogiFlow.

Interrupt at 20s: “Stop. What did *you* build — not the team?”

YOU SAY

I owned FastAPI ranking pipelines and the delay-risk model (HistGB) — 73.0 / 68.0 delayed recall / 78.3 ROC-AUC — and Docker packaging with the team. Ranking UI was shared; the risk model and serving path were mine.

INTERVIEWER Those numbers look modest. Why should I trust you?

YOU SAY

Because I won't inflate them. Accuracy alone hid missed delays; I moved the story to recall on purpose. I'd rather bring honest metrics a clinician-adjacent team can challenge than a vanity score.

INTERVIEWER So you're an ML person. Can you take a boring backend ticket?

YOU SAY

Yes. Most of LogiFlow ownership was pipelines, APIs, data shape, Docker — the model was one slice. As an EID intern I'll take whatever backlog slice helps the team; I care about shipping tested work.

INTERVIEWER Why GEHC — one minute, then I'll cut you.

At 40s: “So it's just brand?”

YOU SAY

No — brand isn't enough. I want the reliability bar of software near clinical workflows, and EID gives mentorship on a live team. If it were only brand I'd apply anywhere.

INTERVIEWER Offer from a product company mid-internship — what do you do?

YOU SAY

I finish commitments. I chose EID for the problem and learning; I don't ghost a team. Any decision after the internship would be after I've delivered here.

INTERVIEWER Weakness — don't give me a humblebrag.

YOU SAY

Early GSC: I over-scoped. We were drowning. I learned to cut to a shippable core. Still watch myself when a cool feature appears — I time-box or park it.

INTERVIEWER Bengaluru. Any family “maybe”?

YOU SAY

No maybe — full duration, on-site, ready on your timeline.

INTERVIEWER Ask me something that isn't stipend or PPO.

YOU SAY

When an EID intern is struggling silently, how do you want them to surface that — and how early?

Pass = short answers, “I” ownership, honest metrics, Bengaluru certainty. Fail = we-we-we, vanity accuracy, PPO USP, stipend questions.

Public LinkedIn / GFG / company posts only · Kavya Bhatiya prep · not affiliated with GE HealthCare · do not name-drop LinkedIn in the interview

PM Mock 6 — EID Intern · Day-of cold run

Shortest full loop · morning-of rehearsal · 15 min · no notes

15 min

Cold

Must land

EID Intern

Run once the morning of. Then stop rehearsing. If you blank, use the order below as a mental checklist.

Min	They ask	You must land
0–1	Intro	Name · SVNIT · 9.05 · LogiFlow Top 106 · EID Intern
1–5	Project	What you owned · 73/68/78.3 · hard = recall not vanity accuracy
5–8	Why GEHC / EID	Reliability bar · live team · not any internship
8–11	One STAR	Conflict or feedback — Result in one line
11–13	Bengaluru	Full yes · no constraints
13–15	Your Q	Strong EID intern week 2 vs 6

INTERVIEWER Intro.

YOU SAY (~45s)

Good morning. Kavya Bhatiya, B.Tech AI, SVNIT Surat, CGPA 9.05. Cleared technical. Strongest work LogiFlow — FastAPI, PostgreSQL, Next.js, delay-risk ML — Top 106 GSC 2026. Here for EID Intern to contribute on a live healthcare software team in Bengaluru.

INTERVIEWER Project — what did you own?

YOU SAY (~60s)

Ranking pipelines + delay-risk model. Tuned for 68% delayed recall / 78.3% ROC-AUC because missing delays mattered more than flattering accuracy. Hard part was changing the metric story under deadline. Outcome Top 106.

INTERVIEWER Why us?

YOU SAY (~40s)

GEHC: imaging, monitoring, software/AI (Edison) clinicians rely on. I want that reliability bar. EID = ship under seniors. That's the internship I want.

INTERVIEWER One teamwork example.

YOU SAY (~40s)

Metrics vs UI polish — time-boxed polish, locked defensible metrics. Compromise on polish, not on numbers.

INTERVIEWER Location? Questions?

YOU SAY

Bengaluru full duration — yes. Question: what does a strong EID intern look like in week 2 versus week 6?

Do **not** say: USP for the organisation · internship learning to date · Cloud Run · invent SKUs · ask PPO odds.

Set 2 — New review questions (not in Mocks 1–6)

IIT BHU HR

SVNIT 2024 kill-shot

PCON EID

Freshers Dunia 2026

Still SKIP (PPO): “project you’re on + USP for the organisation” · “learning in the internship to date.”

New sources → new Q themes

Source	New theme for EID Intern	Mock
GFG GE Intern On-Campus 2022	Managerial = resume roasting + many situational Qs · Why GE from PPT · 42 min	7
Same · HR 15–18 min	Challenges in projects · how will this internship help you?	8
GFG GEHC Intern 2021 HR	Healthcare vs product/service · why only GEHC · what do you know about GE · role flexibility Q	8
GFG GEHC On-Campus (IIT BHU)	What do you expect from this intern? · interest in medical field · instruments/ideas for health problems	9
GFG SVNIT Aug 2024 HR (reject)	Products · competitors · relocate — tech clear ≠ offer	10
PCON EID Intern 2024	Strength/weakness with reason · semester challenges	11
GFG SVNIT selected + senior	Availability · org understanding · challenge STAR · hobbies/clubs	11
GFG PPO HR one-off (adapted)	Humble: changes to org? · if we call a professor/mentor feedback?	12
Freshers Dunia SW Intern 2026	Process confirms Managerial Discussion then HR — both matter	all
AmbitionBox PM (light)	Underperforming teammate / influence without authority — intern-scaled	7

Set 2 rule: New stories where possible — SMSRF/NSGA-II, Web Wonders/Echelon, semester load, professor feedback — not only the LogiFlow recall STAR from Set 1.

Set 2 · public GFG / PCON / Freshers Dunia / AmbitionBox · EID Intern · Kavya prep · not affiliated with GEHC

Mock 7 — Resume roast + situational barrage

GFG GE Intern 2022 managerial · ~40 min pattern compressed to 25 · EID Intern

25 min

Resume roast

Situational

Source: Managerial round described as “basically resume roasting” + many situational Qs + Why GE?

Time	Block
0–2	Intro (≤90s)
2–10	Line-by-line resume: LogiFlow → SMSRF → LC → competitions
10–18	Situational rapid fire
18–22	Why GEHC (use real reasons, not vague brand)
22–25	Bengaluru + your Q

INTERVIEWER Introduce yourself — under 90 seconds.

YOU SAY

Kavya Bhatiya, B.Tech AI, SVNIT Surat, CGPA 9.05. Cleared tech. I build measurable systems — LogiFlow Top 106 GSC 2026; multi-objective research with NSGA-II; 470+ LeetCode. Here for EID Intern in Bengaluru.

INTERVIEWER CGPA 9.05 — what does that say about how you work under load?

YOU SAY

Consistency over spikes. I plan weekly: academics + project slices + DSA. When GSC collided with semesters I cut project scope instead of letting grades or the core demo slip.

INTERVIEWER SMSRF / NSGA-II on the resume — one minute, no jargon dump.

YOU SAY

Multi-objective recommender research — optimising conflicting goals (e.g. novelty vs serenity) with NSGA-II. Reported gains vs a baseline on MovieLens. Habit: when goals conflict, measure trade-offs explicitly — same habit as LogiFlow’s four objectives.

INTERVIEWER Teammate misses a deadline two days before a demo. What do you do?

YOU SAY

Check blockers without blame → re-scope their slice to a minimum → take a parallel critical path if I can → tell the team early what’s at risk. Never surprise the demo with silence.

INTERVIEWER Senior asks for a feature that would break your metric honesty. Response?

YOU SAY

Explain the failure mode in one sentence + offer a safer alternative (flag as experimental / behind a toggle). I won’t ship a number I can’t defend — especially near clinical-adjacent software.

INTERVIEWER Why GE HealthCare — and don’t say “brand.”

YOU SAY

Imaging + monitoring + Edison AI layer = software that must earn trust. I want that reliability bar as my first internship. Bengaluru engineering + EID mentorship is the learning environment I chose — not any logo.

INTERVIEWER Relocate? Question?

YOU SAY

Yes, full Bengaluru. Q: In managerial check-ins, what signal tells you an intern is on track by week 3?

Mock 8 — HR-leaning gate (still post-tech)

GFG Intern 2021 HR + GE Intern 2022 HR · ~15–20 min · own answers not internet scripts

20 min

Why only GEHC

Internship help you?

Tips from selected Intern 2021: give your own answers — don't paste standard internet HR lines.

INTERVIEWER Tell me about yourself — person, not only resume.

YOU SAY

From Vadodara; AI at SVNIT. I like building things I can measure. Outside class: DSA, campus finals (Web Wonders, Echelon). Cleared tech; excited for EID Intern.

INTERVIEWER Why healthcare instead of a service or pure product company?

YOU SAY

Service/product often optimises delivery speed or engagement. Healthcare raises the cost of being wrong. I want to learn that bar early — LogiFlow already pushed me toward honest risk metrics.

INTERVIEWER In healthcare — why only GE HealthCare?

GFG Intern 2021 — explicit “why only GE Healthcare?”

YOU SAY

Because of the stack I want to grow in: devices plus Edison AI/analytics, Bengaluru engineering depth, and an EID path with real mentorship. I'm not applying “healthcare anywhere” — this is the specific engineering culture I researched.

INTERVIEWER What do you know about GE / GE HealthCare?

YOU SAY

GE HealthCare is standalone med-tech. Imaging (MRI, CT, ultrasound, X-ray), patient monitoring, software/AI (Edison). Roots tie to Edison's industrial legacy — I won't invent founder trivia beyond what's solid. Customers: hospitals and clinicians.

INTERVIEWER How will this internship help you?

GE Intern 2022 HR

YOU SAY

Code review on a live backlog, healthcare quality habits, and working with seniors who've shipped regulated software. I'll contribute ownership; I'll leave with sharper engineering judgment.

INTERVIEWER Challenge in a project — how did you overcome it?

YOU SAY

GSC + academics: early over-scope. Cut to core ranking + delay-risk; time-boxed polish. Landed Top 106. Fix was prioritisation, not working longer blindly.

INTERVIEWER Any questions? (roles flexibility / tech stack OK)

YOU SAY

How flexible is intern staffing across teams if skills fit? What languages/stacks do EID interns commonly touch in the first month?

Mock 9 — Expectations + medical-field interest

GFG GEHC On-Campus IIT BHU HR pattern · “put your views forward clearly”

20 min

Expect from intern?

Health problems ideas

INTERVIEWER Tell me about yourself. Hobbies?

YOU SAY

Kavya, AI at SVNIT, CGPA 9.05. LogiFlow Top 106. Hobbies: DSA practice, campus competitions, reading healthcare-tech explainers — short.

INTERVIEWER What are you expecting from this internship?

IIT BHU HR — CONFIRMED theme

YOU SAY

A real ticket on a backlog, weekly feedback, and the chance to ship a tested slice. I expect to be useful by week 3–4, not only “learning by watching.” Mentorship + ownership.

INTERVIEWER Are you interested in the medical field — or only coding?

YOU SAY

I’m an engineer first — but I’m drawn to medical tech because the users are clinicians and patients. I don’t claim clinical training; I claim respect for reliability and clear communication of uncertainty (same as our delay-risk as advisory, not verdict).

INTERVIEWER What more instruments or machines / software could help health problems?

IIT BHU — wanted to see genuine interest, not memorised product list

YOU SAY

Stay humble and concrete: better workflow software that reduces missed follow-ups; decision-support that surfaces risk without replacing the clinician; monitoring alerts that cut false alarms so nurses don’t ignore them. I care about false negatives and alert fatigue — that’s an engineering problem I already felt on delay recall vs accuracy.

INTERVIEWER Prefer building devices or software?

YOU SAY

Software — backends, data pipelines, ML in systems. Devices matter; my skill path is the software layer that makes device data trustworthy.

INTERVIEWER Bengaluru? Questions?

YOU SAY

Yes. Q: How do interns get exposure to the clinical/context side without being clinicians?

Mock 10 — SVNIT HR kill-shot pack

GFG SVNIT Aug 2024 · cleared tech · rejected at HR on products / competitors / relocate

15–20 min

Must not fail

Cold answers

This mock is non-negotiable. Tech clear ≠ offer. Drill until answers are automatic.

INTERVIEWER Name GE HealthCare products you know.

YOU SAY

Imaging: MRI, CT, ultrasound, X-ray. Patient monitoring. Software/AI layer — Edison — analytics on device data. I'm not inventing model numbers or SKUs.

INTERVIEWER Competitors?

YOU SAY

At a high level: Siemens Healthineers and Philips in imaging/monitoring. I chose GEHC for Edison/EID and the engineering path I want — not because I claim a full market analysis.

INTERVIEWER Willing to relocate to Bengaluru for the full duration?

YOU SAY

Yes — on-site Bengaluru, full internship, no constraints. Family is aligned. No-shows aren't an option.

INTERVIEWER Any hesitation — hostel, family, exams?

YOU SAY

I've planned around the internship dates. Academics won't block attendance. If something extreme happened I'd communicate early — but I'm committing fully now.

INTERVIEWER Why should we take you over someone with a similar CGPA?

YOU SAY

Ownership with honest metrics — Top 106 LogiFlow, clear "I" contribution, and I've prepared company basics so HR isn't a surprise after tech.

INTERVIEWER Other offers?

YOU SAY

Be factual. If none: "No competing offer I'm weighing; GE HealthCare EID is my priority." Never invent offers.

Pass = products + competitors + relocate in <45s each, calm tone. Fail = "I'll check with family" · blank on Siemens/Philips · inventing CT model names.

Mock 11 — Semester challenges + prove every adjective

PCON EID 2024 · FTE HR “good at teamwork — give example” · SVNIT challenge STAR

20 min

Proof required

INTERVIEWER Strength — and why do you say that?

YOU SAY

Ownership under deadlines. Proof: GSC — I owned delay-risk + pipelines and pushed recall/ROC-AUC when accuracy looked nicer so the team’s story was defensible. Top 106.

INTERVIEWER Weakness — with a fix, not a humblebrag.

YOU SAY

Over-scoping early. Fix: force a thin slice + time-box. Still watch myself when a shiny feature appears.

INTERVIEWER Challenge during college semesters?

PCON EID Intern 2024 HR

YOU SAY

Balancing GSC build with coursework and DSA. Hard part was energy, not intelligence. System: calendar blocks, cut project scope, protect sleep before exams. Grades held (9.05) and project shipped.

INTERVIEWER You’re good at teamwork — prove it.

GFG FTE EEDP HR — adjective needs example

YOU SAY

Clear interfaces + no fake metrics. Example: disagreement on UI vs metrics — I didn’t override; I showed the confusion matrix and we aligned. Teammates could trust the demo narrative.

INTERVIEWER Tell me about Web Wonders / Echelon — what did you actually do?

YOU SAY

Keep truthful to resume: finalist-level campus competitions — prep under time pressure, ship a working demo, take jury feedback. Transferable: calm under timed evaluation, same as interview day.

INTERVIEWER How do you handle a teammate who is underperforming?

AmbitionBox PM theme — scaled to intern/peer

YOU SAY

Private check-in first (blocker vs skill vs load) → offer a smaller clear task → escalate early if demo risk rises. Don’t gossip; don’t carry silently until failure.

INTERVIEWER Bengaluru? One question.

YOU SAY

Yes. Q: How do you want interns to flag when they’re stuck — same day or in standup only?

Mock 12 — Curveballs + clean close

Odd one-offs from scrapes · stay humble · 15–20 min

20 min

Curveballs

Day-before

INTERVIEWER If I call one of your professors or a project mentor — what would they say about you?

Adapted from GFG “ex-employer feedback” HR probe

YOU SAY

That I deliver what I promise, ask precise questions, and don’t hide bad news. They’d also say I can over-invest in polish — I’ve been fixing that with time-boxes.

INTERVIEWER What changes should GE HealthCare incorporate?

GFG PPO HR one-off — dangerous if arrogant

YOU SAY

As an outsider I won’t prescribe. I’d ask what slows new-intern onboarding and help there. Curiosity beats criticism.

INTERVIEWER Where do you see yourself in 5 years?

YOU SAY

A strong backend/applied-ML engineer who owns reliability-critical components in healthcare software. Prefer compounding here if I earn it — not hopping for titles.

INTERVIEWER Will you pursue a master’s next year?

YOU SAY

Near term: industry. This internship isn’t a placeholder. Master’s later only if a specific problem needs research depth.

INTERVIEWER Online/hybrid classes — how did you stay disciplined?

GFG Intern 2021 HR asked about online education

YOU SAY

Fixed schedule, camera-on when required, weekly goals for DSA + projects. Treat remote like on-site — same for a Bengaluru internship day.

INTERVIEWER Sell me on hiring you in 45 seconds.

YOU SAY

I ship and measure. LogiFlow Top 106 with honest metrics I can defend. I’ve prepared GEHC basics so I’m ready for PM and HR. Bengaluru full yes. I’ll take feedback and make the team’s life easier, not harder.

INTERVIEWER Questions?

YOU SAY

What does a strong EID intern look like in week 2 vs week 6?

After Mock 12: stop inventing new stories. Sleep. Morning-of = Set 1 Mock 6 cold run only.
