

Surekha Sailesh — Findings

Public-web only · Edison Program Manager (confirmed by GEHC TA posts) · Kavya Edison Intern PM round

Spelling: Sailesh (not Shailesh)

Bengaluru

Sr. Manager — Strategic Programs

Highest-likelihood PM panelist

Why she matters for you. Multiple GE HealthCare India / TA posts for the 2025 Edison intern cohort explicitly thank *Edison Program Manager Surekha Sailesh* alongside APAC TA Head Annu Mathew and HR partners. A GE HealthCare India “Desk Diaries” post notes photos of her *Edison batches* on her desk — early-talent is core to her work. For a post-tech “Program Manager” round on Edison Intern, she is the highest-probability named interviewer from public sources.

Inference vs fact. Role + Edison Program Manager title = CONFIRMED. Exact Saturday panel assignment is NOT public. Everything about “how she interviews” is INFERENCE from role + campus EID Intern managerial patterns. Do not say “I saw your LinkedIn.”

EID Intern ≠ PPO. GFG “project you are on / USP for the organisation” and “learning in the internship to date” are for people *already interning* converting to FTE. Kavya is a **campus EID Intern** candidate — ask about *her* projects (LogiFlow), why GEHC/EID, ownership, Bengaluru — not GE project USP.

CONFIRMED

Edison Program Manager (TA posts)

Apr 2023→

Sr. Manager, Strategic Programs & Initiatives

EID Intern

campus fit · not PPO

1. Confirmed public facts

Item	Detail
Current title	Sr. Manager — Strategic Programs & Initiatives, GE HealthCare (India)
Edison role	Named Edison Program Manager on GEHC intern onboarding posts (May 2025 cohort of 35; SVNIT Surat listed among colleges)
Prior GEHC	India Healthcare Technology Center — Strategic Programs and Initiatives Lead (Nov 2021 → Apr 2023), Bengaluru
Before GEHC	Cisco — Program Manager, Enterprise PMO & Operations; Business Operations / site strategies
Public themes	University relations, early talent, partner/program ops, employee engagement, cross-functional interlock
Culture signal	Desk Diaries: Edison batch photos + art/painting — values young talent energy, not only delivery metrics
Public AI pride	Reposted GEHC topping USFDA AI-enabled medical device authorizations list — cares about healthcare AI impact narrative

2. What she is likely screening for — EID Intern (INFERENCE)

- **Why EID / why healthcare / why GEHC** — genuine, not “any internship.”
- **Ownership on *your* projects** — LogiFlow: what you built, what was hard, honest metrics — not “USP for GE.”
- **Will you show up** — Bengaluru full duration; no-show = withdrawal.
- **Coachability** — feedback, ambiguity, conflict without ego.
- **Curiosity** — what a strong EID intern looks like; how interns are staffed.

She is a **program / strategic ops** leader, not an architect. Expect fit + ownership storytelling, not live coding. Skip PPO phrasing.

3. How to play 20–25 minutes with her

Do	Don't
45s intro → LogiFlow you owned → why healthcare / EID → why GEHC → Bengaluru yes → 1–2 intern questions	PPO “project I’m on at GE” answers · name-drop LinkedIn · invent SKUs · “maybe” on relocate · accuracy-only metrics

One line she should hear.

“I want my first engineering bar to be reliability under clinical-adjacent standards — LogiFlow taught me to defend metrics honestly; EID is where I want to grow that under mentorship.”

Public LinkedIn / GFG / company posts only · Kavya Bhatiya prep · not affiliated with GE HealthCare · do not name-drop LinkedIn in the interview
